Subsistence Management Regulations for Public Lands in Alaska—Cook Inlet Area Regulations

AGENCY: Forest Service, Agriculture; Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This final rule revises the regulations for seasons, harvest limits, and methods and means for the subsistence taking of fish in the Cook Inlet Area of Alaska. This action also reorganizes specific regulations addressing the Kenai River, which will provide clarity for the public, and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking.

DATES: This rule is effective August 9, 2019.

ADDRESSES: The Board meeting transcripts are available for review at

the Office of Subsistence Management, 1011 East Tudor Road, Mail Stop 121, Anchorage, AK 99503, or on the Office of Subsistence Management website (<https://www.doi.gov/subsistence>). The comments received in response to the proposed rule are available on www.regulations.gov in Docket No. FWS-R7-SM-2018-0003.

SUPPLEMENTARY INFORMATION:

Background

Under Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111–3126), the Secretary of the Interior and the Secretary of Agriculture (Secretaries) jointly implement the Federal Subsistence Management Program. This program provides a preference for take of fish and wildlife resources for subsistence uses on Federal public lands and waters in Alaska. The Secretaries published temporary regulations to carry out this program in the **Federal Register** on June 29, 1990 (55 FR 27114), and published final regulations in the **Federal Register** on May 29, 1992 (57 FR 22940). The Program managers have subsequently amended these regulations a number of times. Because this program is a joint effort between Interior and Agriculture, these regulations are located in two titles of the Code of Federal Regulations (CFR): Title 36, “Parks, Forests, and Public Property,” and Title 50, “Wildlife and Fisheries,” at 36 CFR 242.1–242.28 and 50 CFR 100.1–100.28, respectively. The regulations contain subparts as follows: Subpart A, General Provisions; Subpart B, Program Structure; Subpart C, Board Determinations; and Subpart D, Subsistence Taking of Fish and Wildlife.

Consistent with subpart B of these regulations, the Secretaries established a Federal Subsistence Board to administer the Federal Subsistence Management Program. The Board comprises:

- A Chair appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture;
- The Alaska Regional Director, U.S. Fish and Wildlife Service;

- The Alaska Regional Director, National Park Service;
- The Alaska State Director, Bureau of Land Management;
- The Alaska Regional Director, Bureau of Indian Affairs;
- The Alaska Regional Forester, USDA Forest Service; and
- Two public members appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture.

Through the Board, these agencies participate in the development of regulations for subparts C and D, which, among other things, set forth program eligibility and specific harvest seasons and limits.

In administering the program, the Secretaries divided Alaska into 10 subsistence resource regions, each of which is represented by a Federal Subsistence Regional Advisory Council (Council). The Councils provide a forum for rural residents with personal knowledge of local conditions and resource requirements to have a meaningful role in the subsistence management of fish and wildlife on Federal public lands in Alaska. The Council members represent varied geographical, cultural, and user interests within each region.

Current Rule

The Departments published a proposed rule, “Subsistence Taking of Fish; Cook Inlet Area,” on October 1, 2018 (83 FR 49322), to amend 36 CFR 242.27 and 50 CFR 100.27.

The current Cook Inlet area subsistence regulations were revised on May 18, 2015 (80 FR 28187). Two of the revisions addressed community gillnets on the Kasilof and Kenai rivers. While the intent of providing additional opportunities for subsistence users was met, details concerning the harvest limits were difficult and confusing to the public since they overlapped with other active subsistence fisheries on these rivers. In addition, the new regulations were in conflict with existing regulations dealing with early- and late-run Chinook salmon, and various size limits for rainbow trout and Dolly Varden. The Board directed program and field staff to develop recommendations to alleviate these concerns from the Council and members of the public. While some of the size limits are needed as management tools in certain fisheries, the limits are not required in other fisheries. The lack of clarity of season dates with early and late runs of Chinook salmon called for new regulations addressing early-run fish.
