Need and Use of Information Collection: The NIMH Data Archive (NDA) is an infrastructure that allows for the submission and storage of human subjects' data from researchers conducting studies related to many scientific domains, regardless of the source of funding. The NIH and NIMH developed this resource to allow for the public collection of information from: (1) Individuals who seek permission to access data from the NDA for the purpose of scientific investigation, scholarship or teaching, or other forms of research and research development,

via the Data Use Certification (DUC), and (2) individuals who request permission to submit data to the NDA for the purpose of scientific investigation, scholarship or teaching, or other forms of research and research development, via the Data Submission Agreement (DSA). The extensive information stored in the NDA continues to provide a rare and valuable

scientific resource to the field and plays an integral part in fulfilling research objectives in multiple scientific domains. The NIH and the NIMH seek to encourage use of the NDA by investigators in the field of multiple scientific research domains to achieve rapid scientific progress. In order to take full advantage of this resource and maximize its research value, it is

important that data are made broadly available, on appropriate terms and conditions, to the largest possible number of investigators.
