SUPPLEMENTARY INFORMATION:

I. Introduction

During the period from March 1, 2021, to March 30, 2021, the NRC granted five exemptions in response to requests submitted by three licensees from February 4, 2021, to February 25, 2021. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited) of various parts of chapter I of title 10 of the *Code of Federal Regulations* (10 CFR).

The exemptions from certain requirements of 10 CFR part 26, "Fitness for Duty Programs," for Exelon Generation Company, LLC (for Braidwood Station, Units 1 and 2; and Quad Cities Nuclear Power Station, Units 1 and 2); and for PSEG Nuclear LLC (for Hope Creek Generating Station and Salem Nuclear Generating Station, Unit Nos. 1 and 2); afford these licensees temporary relief from the work-hour control requirements under 10 CFR 26.205(d)(1) through (d)(7). The exemptions from 10 CFR 26.205(d)(1) through (d)(7) ensure that the control of work hours and management of worker fatigue does not unduly limit licensee flexibility in using personnel resources to most effectively manage the impacts of the COVID-19 PHE on maintaining the safe operation of these facilities. Specifically, these licensees have stated that their staffing levels are affected or are expected to be affected by the COVID-19 PHE, and they can no longer meet or likely will not meet the work-hour controls of 10 CFR 26.205(d)(1) through (d)(7). These licensees have committed to effecting site-specific COVID-19 PHE fatigue-management

controls for personnel specified in 10 CFR 26.4(a).

The exemption from certain requirements of 10 CFR part 73, appendix B, "General Criteria for Security Personnel," section VI, "Nuclear Power Reactor Training and Qualification Plan for Personnel Performing Security Program Duties," for Pacific Gas and Electric Company (for Diablo Canyon Nuclear Power Plant, Units 1 and 2) ensures that these regulatory requirements do not unduly limit licensee flexibility in using personnel resources to most effectively manage the impacts of the COVID-19 PHE on maintaining the safe and secure operation of this facility and the implementation of the licensee's NRC-approved security plans, protective strategy, and implementing procedures. The licensee has committed to certain security measures to ensure response readiness and for its security personnel to maintain performance capability.

The NRC is providing compiled tables of exemptions using a single **Federal Register** notice for COVID-19 related exemptions instead of issuing individual **Federal Register** notices for each exemption. The compiled tables in this notice provide transparency regarding the number and type of exemptions the NRC has issued. Additionally, the NRC publishes tables of approved regulatory actions related to the COVID-19 PHE on its public website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.

II. Availability of Documents

The tables in this notice provide the facility name, docket number, document description, and ADAMS accession number for each exemption issued. Additional details on each exemption issued, including the exemption request submitted by the respective licensee and the NRC's decision, are provided in each exemption approval listed in the tables in this notice. For additional directions on accessing information in ADAMS, see the **ADDRESSES** section of this document.
