

mission, “To understand and predict changes in climate, weather, oceans, and coasts, to share that knowledge and information with others, and to conserve and manage coastal and marine ecosystems and resources.” The Proposed Action is needed to implement the S–K Act and funding program to build and maintain sustainable fisheries, optimize economic benefits, and increase other opportunities to keep working waterfronts viable.

Types of projects funded by the S–K Program include, but are not limited to, (1) seafood promotion and marketing; (2) research and monitoring; (3) gear testing, bycatch reduction, and processing studies; (4) aquaculture; (5) socioeconomic research; and (6) outreach, education, and planning.

Alternatives

The Draft PEIS considers two alternatives: (1) A No Action Alternative, and (2) the proposed action, which NOAA is referring to as the Promotion, Marketing, Research and Development Alternative (Preferred Alternative). Under the No Action Alternative, the S–K Program would not fund projects that address the needs of fishing communities, optimize economic benefits by building and maintaining sustainable fisheries, and increase other opportunities to keep working waterfronts viable. The No Action Alternative serves as a baseline against which the impacts of the Preferred Alternative are compared. Implementation of the Preferred Alternative would allow for the funding of actions through federal financial assistance for all possible types of projects that meet the intent of the Saltonstall-Kennedy Act and the needs of U.S. fishing communities, consistent with the scope of the S–K Program. This alternative would provide the S–K Program with flexibility in choosing priorities each year while also considering the funding environment.

Draft PEIS Process

This notice initiates a public comment period for the Draft PEIS. Please review the information in this notice and additional information about the S–K Program, located on the NOAA S–K Program website (see the **FOR FURTHER INFORMATION CONTACT** section above). NOAA is particularly interested in receiving comments regarding biological, cultural, or ecological issues that the analysis should address. We also encourage comments that assist us in further delineating the proposed project, its potential to affect the human environment, means for avoiding,

minimizing, or mitigating those effects, and other issues of public concern. To promote informed decision-making, we especially encourage commenters to submit any scientific data, studies, or research that you feel is relevant to the analysis.

To facilitate the public and agency involvement in the PEIS process, NOAA will hold three virtual public meetings during the 45-day Draft PEIS public comment period. The meetings will be virtual in format. The meetings will solicit input from the public and interested public agencies regarding the environmental impacts analyzed in the Draft PEIS. Three virtual public meetings (in webinar format only) will be held in each of three regions, as follows:
