

an MPR is necessary for a well and to establish the appropriate rate. It is not possible to specify an MPR in the absence of information about the production rate capability (potential) of the well. The form asks for, in either fill in the blanks or check marks:

- general information about the well and the company;
- pertinent information relating to the well test; and
- 24-hour rates pertaining to test production.

Form BSEE–0128, Semiannual Well Test Report

BSEE uses this information to evaluate the results of well tests to determine if reservoirs are being depleted in a manner that will lead to the greatest ultimate recovery of hydrocarbons. This information is collected to determine the capability of hydrocarbon wells and to evaluate and verify an operator's approved maximum production rate if assigned. The form was designed to present current well data on a semiannual basis to permit the updating of permissible producing rates, and to provide the basis for estimates of currently remaining recoverable gas reserves. The form requires, in either fill in the blanks or check marks:

- general information about the well;
- volumes;
- choke size;
- pressures;
- production method;
- API oil/condensate gravity; and
- date of test.

The ability to request a general departure or alternative compliance are throughout all of 30 CFR part 250 and the hour burdens are approved under 1014–0022 (subpart A). The hours associated with this request will be removed from this information collection.
