

TABLE II—NOCs APPROVED * FROM 08/01/2022 TO 08/31/2022

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
J-22-0011	07/27/2022	07/25/2022	N	(G) Biofuel producing <i>saccharomyces cerevisiae</i> modified, genetically stable.
P-11-0242A ...	08/02/2022	07/09/2021	Revised generic name and added manufacturing/import site.	(G) Bicycloolefinic hydroxyester.
P-15-0734	08/11/2022	08/02/2022	N	(G) Acrylate, polymer with substituted ethyleneamine.
P-18-0289A ...	08/17/2022	06/22/2022	Revised generic name	(G) 2-(2(phenylmethylene)amino)ethoxy)-alcohol.
P-18-0290A ...	08/17/2022	06/22/2022	Revised generic name	(G) Phenyl-oxazolidine.
P-19-0046	08/24/2022	05/03/2019	N	(S) 1,2,4-benzenetricarboxylic acid, mixed decyl and octyl triesters.
P-19-0143	08/07/2022	07/21/2022	N	(G) Aldehyde, polymer with mixed alkanepolyamines, 2,2-[1,4-alkanediylbis(oxyalkylene)] bis[oxirane], 2-(alkoxyalkyloxirane, 4,4-(1-alkylidene)bis[phenol], 2,2-[(1-alkylidene)bis(4,1-alkyleneoxyalkylene)]bis[oxirane] and 2-(aryloxyalkyl)oxirane, acetate (salt).
P-19-0144	08/07/2022	07/21/2022	N	(G) Alkanedioic acid, compds. with substituted arylalkylamine-arylalcohol disubstituted alkane—the diglycidyl ether of a arylalcohol disubstituted alkane-epichlorohydrin-aldehyde-2,2-[(1-alkylidene)bis[4,1-aryleneoxy(alkyl-2,1-alkanediyl)oxyalkylene]]bis[oxirane]-alkanepolyamine polymer-1-[[2-[(2-aminoalkyl)amino]alkyl]amino]-3-aryloxy-2-alcohol reaction products.
P-20-0127	08/29/2022	08/23/2022	N	(S) 2h-pyran, tetrahydro-4-methyl-
P-21-0196	08/17/2022	07/20/2022	N	(S) 5h-1,2-oxathiole, 2,2-dioxide.
P-21-0197	08/17/2022	07/20/2022	N	(G) Imidazole-carboxylic acid, substituted.

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission.

In Table III of this unit, EPA provides the following information (to the extent such information is not subject to a CBI claim) on the test information that has been received during this time period: The EPA case number assigned to the test information; the date the test information was received by EPA, the type of test information submitted, and chemical substance identity.

TABLE III—TEST INFORMATION RECEIVED FROM 08/01/2022 TO 08/31/2022

Case No.	Received date	Type of test information	Chemical substance
P-15-0443	08/10/2022	90-Day Inhalation Toxicity Testing (OECD Test Guideline 413).	(G) Rare earth doped zirconium oxide.
P-16-0543	08/03/2022	Industrial Hygiene Exposure Report.	(G) Halogenophosphoric acid metal salt.

If you are interested in information that is not included in these tables, you may contact EPA's technical information contact or general information contact as described under **FOR FURTHER INFORMATION CONTACT** to access additional non-CBI information that may be available.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: September 15, 2022.

Pamela Myrick,
Director, Project Management and Operations Division, Office of Pollution Prevention and Toxics.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Flexible Vinyl and Urethane Coating and Printing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Flexible Vinyl and Urethane Coating and Printing (EPA ICR Number 1157.13, OMB Control Number 2060-

0073), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested, via the **Federal Register**, on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before October 24, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2022-0070, online using <https://www.regulations.gov/> (our preferred method), or by email to doCKET@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

The EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The New Source Performance Standards (NSPS) for Flexible Vinyl and Urethane Coating and Printing were proposed on January 18, 1983; promulgated on June 29, 1984; and amended on October 17, 2000. These regulations apply to facilities with rotogravure printing lines used to either print or coat flexible vinyl or urethane products for which construction, modification or reconstruction commenced after January

18, 1983. This information is being collected to assure compliance with 40 CFR part 60, subpart FFF.

Form Numbers: None.

Respondents/affected entities: Flexible vinyl and urethane coating and printing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart FFF).

Estimated number of respondents: 42 (total).

Frequency of response: Semiannual.

Total estimated burden: 1,340 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$545,000 (per year), which includes \$385,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The adjustment increase in burden is due to more accurate estimates of existing and anticipated new sources. This ICR assumes a continuous growth rate of one new facility every three years. There is an increase in the operation and maintenance (O&M) costs due to an increase in the number of existing respondents from the currently approved ICR; there is no change in capital costs.

Courtney Kerwin,

Director, Regulatory Support Division.

Phasedown of Hydrofluorocarbons: Notice of Grant of Request To Extend Compliance Date for Requirements To Control Emissions of Hydrofluorocarbon-23

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces that the U.S. Environmental Protection Agency (EPA) granted a request for a six-month extension of the October 1, 2022, compliance date for a facility to control emissions of hydrofluorocarbon-23. The requestor submitted a timely and complete request with a credible rationale for an extension and a reasonable plan to meet compliance

requirements and reduce emissions of this potent greenhouse gas. The Agency granted the request in a letter dated September 13, 2022.

FOR FURTHER INFORMATION CONTACT: John Feather, U.S. Environmental Protection Agency, Stratospheric Protection Division; telephone number 202-564-1230; or email address: feather.john@epa.gov. You may also visit our website at <https://www.epa.gov/climate-hfcs-reduction/control-HFC-23-emissions> for further information.

SUPPLEMENTARY INFORMATION:

Throughout this document, whenever "we," "us," "the Agency," or "our" is used, we mean EPA. Acronyms that are used in this rulemaking that may be helpful include:

AIM Act—American Innovation and Manufacturing Act
CFR—Code of Federal Regulations
EPA—Environmental Protection Agency
FR—Federal Register
GWP—Global Warming Potential
HCFC—hydrochlorofluorocarbon
HFC—hydrofluorocarbon
HFO—hydrofluoroolefin

I. General Information

A. Why is EPA issuing this notice?

This notice is directed to the public to announce an action that EPA has taken. On September 13, 2022, EPA issued a letter granting a request for a six-month extension of the October 1, 2022, compliance date for a facility to control emissions of hydrofluorocarbon (HFC)-23, which has been posted to EPA's website (<https://www.epa.gov/climate-hfcs-reduction/control-HFC-23-emissions>) and can be found in the docket for this notice (Docket ID No. EPA-HQ-OAR-2022-0755).

B. Background

HFC-23 is a very potent greenhouse gas with a 100-year global warming potential (GWP) of 14,800.¹ While EPA is also aware of limited instances where HFC-23 is captured, purified, and used for commercial purposes such as fire suppression, very low temperature refrigeration, and semiconductor manufacturing, the majority of HFC-23 is unintentionally created as a byproduct during the production of

¹ Exchange values of regulated substances, including for HFC-23, are listed in 40 CFR part 84, appendix A. These exchange values are identical to the 100-year GWPs included in IPCC (2007). In this notice, EPA uses the terms "global warming potential" and "exchange value" interchangeably.
