

it should undermine the protections against robocalls that the statute provides to consumers by granting a waiver to AATM. AATM has not demonstrated any special circumstances that warrant a waiver or that a waiver of the Commission's rules is in the public interest. AATM is not precluded from using its ringless voicemail service, but it must do so in accordance with the TCPA.

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Closure of the General Category December Fishery for 2022

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the General category fishery for large medium and giant (*i.e.*, measuring 73 inches (185 centimeters) curved fork length or greater) Atlantic bluefin tuna (BFT) for the December subquota time period, and thus for the remainder of 2022. This action applies to Atlantic Tunas General category (commercial) permitted vessels and highly migratory species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT. Fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag-and-release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs. On January 1, 2023, the fishery will reopen automatically.

DATES: Effective 11:30 p.m., local time, December 10, 2022, through December 31, 2022.

FOR FURTHER INFORMATION CONTACT: Erianna Hammond, erianna.hammond@noaa.gov, 301-427-8503, Larry Redd, Jr., larry.redd@noaa.gov, 301-427-8503, or Nicholas Velseboer,

nicholas.velseboer@noaa.gov, 978-281-9260.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries, including BFT fisheries, are managed under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*). The 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments are implemented by regulations at 50 CFR part 635. Section 635.27 divides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

Under § 635.28(a)(1), NMFS files a closure action with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. Retaining, possessing, or landing BFT under that quota category is prohibited on or after the effective date and time of a closure notice for that category until the opening of the relevant subsequent quota period or until such date as specified.

The current baseline quota for the General category is 587.9 metric tons (mt). The General category baseline quota is suballocated to different time periods. Relevant to this action, the baseline subquota for the December time period is 30.6 mt. To date for 2022, NMFS has published several actions that adjusted the General category December 2022 time period quota (86 FR 72857, December 23, 2021; 87 FR 33049, June 1, 2022). Most recently, NMFS increased the December subquota to 50.1 mt through an inseason quota transfer (87 FR 73504, November 30, 2022).

Closure of the December 2022 General Category Fishery

To date, reported landings for the General category December subquota time period total approximately 38.5 mt. Based on these landings, NMFS has determined that the adjusted 2022 subquota of 50.1 mt is projected to be reached shortly. Therefore, retaining,
