**SUPPLEMENTARY INFORMATION:** Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. A program for regular cleanup and removal of accumulations of coal and float coal dusts, loose coal,

Effective and frequent rock dust application is necessary to protect miners from the potential of a float coal dust explosion or, if one occurs, to reduce its propagation. 30 CFR 75.400–2 requires that mine operators establish and maintain a “program for regular cleanup and removal of accumulations of coal and float coal dusts, loose coal, and other combustibles.” In addition, the cleanup program must be available to the Secretary or Labor or authorized representative. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 31, 2022 (87 FR 53504).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.
