

b. Cooper Tire & Rubber Company, 82 FR 52966 (November 15, 2017).

c. Cooper Tire & Rubber Company, 82 FR 17510 (April 11, 2017).

CTA states that it is not aware of any tire failures related to performance that resulted in an accident, injury, property damage, customer complaint, or any field reports associated with the mislabeling.

CTA says that it has quarantined its current inventory of the noncompliant tires—leaving three tires remaining in the market.

CTA concludes that the subject noncompliance is inconsequential as it relates to motor vehicle safety and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

VI. NHTSA's Analysis

In determining inconsequentiality of a noncompliance, NHTSA focuses on the safety risk to individuals who experience the type of event against which a recall would otherwise protect.³ In general, NHTSA does not consider the absence of complaints or injuries when determining if a noncompliance is inconsequential to safety. The absence of complaints does not mean vehicle occupants have not experienced a safety issue, nor does it mean that there will not be safety issues in the future.⁴

Arguments that only a small number of vehicles or items of motor vehicle equipment are affected also do not justify granting an inconsequentiality petition.⁵ Similarly, mere assertions that

only a small percentage of vehicles or items of equipment are likely to actually exhibit a noncompliance are unpersuasive. The percentage of potential occupants that could be adversely affected by a noncompliance is not relevant to whether the noncompliance poses an inconsequential risk to safety. Rather, NHTSA focuses on the consequence to an occupant who is exposed to the consequence of that noncompliance.⁶ The Safety Act is preventive, and manufacturers cannot and should not wait for deaths or injuries to occur in their vehicles before they carry out a recall.⁷ Indeed, the very purpose of a recall is to protect individuals from risk.⁸

NHTSA has evaluated the merits of the petition submitted by CTA and is denying CTA's request for relief from notification and remedy.

The purpose of the TIN is to provide a means by which tire manufacturers may notify purchasers of defective or nonconforming tires.

CTA cited three prior petitions in support of their own petition. In the Michelin North America, Inc., 85 FR 37495 (June 22, 2020) petition the subject tires contained a TIN, however, the symbol "DOT" was incorrectly placed after the 1st grouping of TIN characters. For the Cooper Tire & Rubber Company, 82 FR 52966 (November 15, 2017) and Cooper Tire & Rubber Company, 82 FR 17510 (April 11, 2017) petitions the manufacturer incorrectly used the wrong characters for the plant code portion of the TIN on one sidewall. The Agency does not find the petitions CTA cited as relevant to this petition. In each of the petitions cited by CTA, the tires contain a full TIN on at least 1 sidewall of the tire that can be utilized for the purposes of identification in the event of a recall. The tires that are the subject of this petition do not have a full or partial TIN on either sidewall.

Denial of Petition for Decision of Inconsequential Noncompliance, 81 FR 41370 (June 24, 2016) (noting that situations involving individuals trapped in motor vehicles—while infrequent—are consequential to safety); *Morgan 3 Wheeler Ltd.; Denial of Petition for Decision of Inconsequential Noncompliance*, 81 FR 21663, 21664 (Apr. 12, 2016) (rejecting argument that petition should be granted because the vehicle was produced in very low numbers and likely to be operated on a limited basis).

⁶ See *Gen. Motors Corp.; Ruling on Petition for Determination of Inconsequential Noncompliance*, 69 FR 19897, 19900 (Apr. 14, 2004); *Cosco Inc.; Denial of Application for Decision of Inconsequential Noncompliance*, 64 FR 29408, 29409 (June 1, 1999).

⁷ See, e.g., *United States v. Gen. Motors Corp.*, 565 F.2d 754, 759 (D.C. Cir. 1977).

⁸ *Id.*

Furthermore, NHTSA disagrees with CTA's assertion that the date code is sufficient to register and uniquely identify a tire. Without a TIN, there is no means by which purchasers can register the subject tires. In the event of a recall, CTA may be unable to timely notify purchasers of a potential safety issue, and consumers and other drivers will be at risk. If an original purchaser of a subject tire previously sold or will sell their vehicle to a different consumer, it is unlikely that CTA will be able to timely notify the subsequent consumer of potential safety issues. Additionally, it may not even be possible for CTA to determine how to contact a subsequent consumer. For these reasons, the Agency is denying this petition for relief from notification and remedy.

VII. NHTSA's Decision

In consideration of the foregoing, NHTSA has decided that CTA has not met its burden of persuasion that the subject FMVSS No. 139 noncompliance is inconsequential to motor vehicle safety. Accordingly, CTA's petition is hereby denied and CTA is consequently obligated to provide notification of and free remedy for that noncompliance under 49 U.S.C. 30118 and 30120.

SUPPLEMENTARY INFORMATION:

The OCC is requesting comment on the following revision to an approved information collection:

Title: Company-Run Annual Stress Test Reporting Template and Documentation for Covered Institutions with Total Consolidated Assets of \$250 Billion or More under the Dodd-Frank Wall Street Reform and Consumer Protection Act.

OMB Control No.: 1557–0319.

Description: Section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act¹ (Dodd-Frank Act) requires certain financial companies, including national banks and federal savings associations, to conduct annual stress tests² and

requires the primary financial regulatory agency³ of those financial companies to issue regulations implementing the stress test requirements.⁴ Under section 165(i)(2), a covered institution is required to submit to the Board of Governors of the Federal Reserve System (Board) and to its primary financial regulatory agency a report at such time, in such form, and containing such information as the primary financial regulatory agency may require.⁵

On October 9, 2012, the OCC published in the **Federal Register** a final rule implementing the section 165(i)(2) annual stress test requirement.⁶ This rule describes the reports and information collections required to meet the reporting requirements under section 165(i)(2). These information collections will be given confidential treatment (5 U.S.C. 552(b)(4)) to the extent permitted by law.

In 2012, the OCC first implemented the reporting templates referenced in the final rule. See 77 FR 49485 (August 16, 2012) and 77 FR 66663 (November 6, 2012). The OCC uses the data collected to assess the reasonableness of the stress test results of covered institutions and to provide forward-looking information to the OCC regarding a covered institution's capital adequacy. The OCC also may use the results of the stress tests to determine whether additional analytical techniques and exercises could be appropriate to identify, measure, and monitor risks at the covered institution. The stress test results are expected to support ongoing improvement in a covered institution's stress testing practices with respect to its internal assessments of capital adequacy and overall capital planning. The OCC proposed new changes to these templates on October 27, 2021.⁷

The OCC recognizes that many covered institutions with total consolidated assets of \$250 billion or more are required to submit reports using reporting form FR Y–14A.⁸ The OCC also recognizes the Board has made modifications to the FR Y–14A and, to the extent practical, the OCC is keeping its reporting requirements consistent with the Board's FR Y–14A to minimize burden on covered institutions. Therefore, the OCC is revising its reporting requirements to mirror the

Board's FR Y-14A for covered institutions with total consolidated assets of \$250 billion or more.

The OCC's changes include only limited updates to reflect the changes made by the Board, and the OCC reporting forms will substantially resemble the forms used by the OCC last year. Many of the changes made by the Board are inapplicable to OCC-regulated institutions and involve new items that would not be collected by the OCC under the changes. The OCC's changes include the minimal adjustments necessary to align line items with placement on the 2022 FR Y-14A. The OCC is also changing the description of covered institutions required to complete the trading and counterparty credit risk (CCR) sub-schedules under the Global Market Shock (GMS) scenario to more closely align with the Board's description. The OCC does not expect these changes to impact the group of banks that have been required to submit under the GMS in prior years. The OCC's new reporting forms and instructions are available on the OCC's website at <https://www.occ.treas.gov/publications-and-resources/forms/dodd-frank-act-stress-test/index-dodd-frank-act-stress-test.html>.

Type of Review: Revision. *Affected Public:* Businesses or other for-profit.

Estimated Number of Respondents: 4 annually and 4 biennially. *Estimated Total Annual Burden:* 3,558 hours.

The OCC believes that the systems that covered institutions use to prepare the FR Y-14 reporting templates and submit to the Board will also be used to prepare the reporting templates described in this notice. On December 5, 2022, the OCC published a notice for 60 days of comment concerning this collection as revised, 87 FR 74470. No comments were received. Comments continue to be invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility; (b) The accuracy of the OCC's estimate of the burden of the collection of information; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; (d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) Estimates of capital or start-up costs and costs of operation,

maintenance, and purchase of services to provide information.
