

information collection resulting from FCC 19–93 was previously published in the **Federal Register** (see 85 FR 41980), but it has been updated and is now included in this revision request.

On August 3, 2022, the Commission released a Report and Order, FCC 22–63, in IB Docket Nos. 20–330 and 22–273, titled “FCC Updates 17 GHz Rules to Support Spectrum or Satellite Broadband” (*17 GHz Report and Order*). In this Report and Order, the Commission amended its rules to permit use of the 17.3–17.7 GHz band by geostationary satellite orbit (GSO) space stations in the fixed-satellite service (FSS) in the space-to-Earth direction on a co-primary basis with incumbent services, and permit limited GSO FSS (space-to-Earth) use of the 17.7–17.8 GHz band on an unprotected basis with respect to fixed service operations.

The updated rules require FSS applicants seeking authority to operate in the 17 GHz band to submit similar information as other operators in this band, including earth station antenna characteristics, space station technical parameters, satellite system architecture, and power levels, as well as any interference mitigation techniques to help ensure that GSO FSS operations in the 17 GHz band do not interfere with incumbent services. Specifically, the rules require applicants to provide information pertaining to:

- Certification of frequency coordination with the operator of the co-frequency space station or submission of an interference analysis demonstrating the compatibility of the proposed system with the co-frequency space station,
- Information as to earth station antenna characteristics to ensure that antennas are properly aimed and configured and that their signals are not likely to interfere with other systems,
- Implementation of interference detection and mitigation plans to prevent and resolve interference issues.

The changes adopted in this Report and Order will result in a small net annualized increase in burden hours to applicants and licensees under Part 25.

On November 19, 2020, the Commission released a Report and Order, FCC 20–159, in IB Docket No. 18–314, titled “Further Streamlining Part 25 Rules Governing Satellite Services” (*Satellite Services Report and Order*). The *Satellite Services Report and Order* streamlined the Commission’s rules governing satellite services by creating an optional framework for authorizing both the blanket-licensed earth stations and space stations of a satellite system through a unified license. The Report

and Order also permitted earth station applicants to certify compliance with relevant satellite licenses in lieu of providing duplicative or unnecessary technical demonstrations, aligned the build-out requirements for earth stations and space stations, and eliminated unnecessary reporting rules. These changes reduce regulatory burdens, simplify the Commission’s licensing of satellite systems, and provide additional operational flexibility. The Report and Order affected two information collections: OMB Control Numbers 3060–1215 and 3060–0678. The Commission received OMB approval for changes under No. 3060–1215 on August 26, 2021, as reported in 86 FR 52102. The Commission seeks approval for changes under No. 3060–0678 through this supporting statement.

The changes adopted in the Report and Order will result in a net annualized decrease in burden hours to applicants and licensees under Part 25. This submission amends the previous submission to the OMB to reflect these changes.

Additionally, The Commission has updated the International Bureau Filing System (IBFS), including updates to the Form 312, Schedule S. The updated version of Form 312, Schedule S will include several minor changes to the information collection designed to provide clarity to applicants and Commission staff, reduce errors, and make overall improvements to the applicants’ experience in completing the Schedule S. The changes will result in a very small net annualized increase in burden hours to certain applicants under Part 25.
