

Estimated Time per Response: 0.5 hours–0.83 hours.

Frequency of Response: On occasion reporting requirement; Third party disclosure requirement.

Total Annual Burden: 20 hours.

Total Annual Costs: \$3,750.

Needs and Uses: The information collection requirement contained in 47 CFR 73.213 requires licensees of grandfathered short-spaced FM stations seeking to modify or relocate their stations to provide a showing demonstrating that there is no increase in either the total predicted interference area or the associated population (caused or received) with respect to all grandfathered stations or increase the interference caused to any individual stations. Applicants must demonstrate that any new area predicted to lose service as a result of interference has adequate service remaining. In addition, licensees are required to serve a copy of any application for co-channel or first-adjacent channel stations proposing predicted interference caused in any area where interference is not currently predicted to be caused upon the licensee(s) of the affected short-spaced station(s). Commission staff uses the data to determine if the public interest will be served and that existing levels of interference will not be increased to other licensed stations. Providing copies of application(s) to affected licensee(s) will enable potentially affected parties to examine the proposals and provide them an opportunity to file informal objections against such applications.

OMB Control No.: 3060–0865.

Title: Wireless Telecommunications Bureau Universal Licensing System Recordkeeping and Third Party Disclosure Requirements.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Individuals or households, Not-for-profit institutions, and State, Local or Tribal Government.

Number of Respondents and Responses: 84,048 respondents; 84,050 responses.

Estimated Time per Response: .166 hours (10 minutes)—4 hours.

Frequency of Response:

Recordkeeping and third-party disclosure requirements; on occasion reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154(i) and 309(j).

Total Annual Burden: 116,306 hours.

Annual Cost Burden: No cost.

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) as an extension after this 60-day comment period to obtain the full three-year clearance from them.

The purpose of this information collection is to continually streamline and simplify processes for wireless applicants and licensees, who previously used a myriad of forms for various wireless services and types of requests, in order to provide the Commission information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same

licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public, which has access to all publicly available wireless licensing information on-line, including maps depicting a licensee's geographic service area.
