

oriented results—all while minimizing the reporting burden to federal financial assistance recipients. Data from grantees is necessary for understanding programmatic activities supported by this HRSA investment, providing program monitoring and oversight, assessing the sustainability of program-supported activities, and ultimately affording HRSA the insights and ability to make specific, evidence informed policy and program recommendations moving forward. To successfully accomplish the goals of this program in supporting job development and training, it is also crucial that HRSA receives a clear understanding of trainees' existing and needed skillsets, their reception to/feedback about the trainings they receive, and a sense of their potential career trajectories as they

pertain to the workforce training tracks specified by HRSA in the program Notice of Funding Opportunity (HRSA–22–117). There are several consequences of the federal government not collecting the data for the RPHWTN program as described herein. These include: (1) the inability to monitor grant activities and therefore inability to ensure sufficient oversight of and accountability for this HRSA investment, (2) a lost opportunity to better understand the workforce capacity-building needs of the rural communities that HRSA serves, and (3) a failure to gather key information that could ultimately lead to more evidence informed policy and program recommendations in the future.

Likely Respondents: Respondents of these surveys will be RPHWTN grantees and trainees.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (hours)	Total burden hours
Grantees	Baseline Survey	32	1	32	0.25	8.00
	Follow-Up Survey	32	2	64	0.13	8.53
	Exit Survey	32	1	32	0.25	8.00
Trainees	Trainee Survey	500	2	1,000	0.25	250.00
Total		596		1,128		274.53
