permit type may include information on the educational program or a description of the cultural or ceremonial occasion the permit will be used for. NMFS uses this information to determine the eligibility of applicants to receive or renew permits.

The permit coordinators submit the harvest logs for Community Harvest Permits, Ceremonial Permits, and Educational Permits. Harvest logs collect identification information and harvest information for the subsistence fishermen fishing under that permit.

An appeals process is provided for an applicant who receives an adverse initial administrative determination related to their permit application.

Subsistence setline gear buoys must be marked with identification information that consists of the participant's name and address and an ''S'' to indicate subsistence halibut gear. This information is used by NMFS to link fishing gear to the vessel owner or operator and facilitate enforcement of regulations.

The time and cost burden to mark buoys has been increased based on recent comment received for other fisheries off Alaska (OMB Control Number 0648–0353, Alaska Region Gear Identification Requirements). The time estimate to mark a buoy has been increased from 15 minutes to 30 minutes and the cost has been increased from $15 to $100 per respondent.

Minor editorial changes to the forms were made to increase clarity and consistency with other NMFS Alaska Regional Office forms.

Affected Public: Not-for-profit institutions; Business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to Obtain or Retain Benefits, Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.
