CMS-10549 Generic Clearance for Questionnaire Testing and Methodological Research for the Medicare Current Beneficiary Survey (MCBS)

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. Type of Information Collection Request: Extension without change of a currently approved collection; **Title of Information Collection:** Generic Clearance for Questionnaire Testing and Methodological Research for the Medicare Current Beneficiary Survey (MCBS); **Use:** The purpose of this OMB clearance package is to extend the approval of the current generic clearance for the Medicare Current Beneficiary Survey (MCBS). The MCBS Questionnaire Testing and Methodological Research encompasses development and testing of MCBS questionnaires, instrumentation, and data collection protocols, as well as a mechanism for conducting methodological experiments. The current clearance includes six types of potential research activities: (1) cognitive interviewing, (2) focus groups, (3) usability testing, (4a) field testing within the MCBS production environment, (4b) field testing as a separate data collection effort outside of the MCBS production environment, (5) respondent debriefings, and (6) research about incentives.

The MCBS is a continuous, multipurpose survey of a nationally

representative sample of aged, disabled, and institutionalized Medicare beneficiaries. The MCBS, which is sponsored by the Centers for Medicare & Medicaid Services (CMS), is the only comprehensive source of information on the health status, health care use and expenditures, health insurance coverage, and socioeconomic and demographic characteristics of the entire spectrum of Medicare beneficiaries. The core of the MCBS is a series of interviews with a stratified random sample of the Medicare population, including aged and disabled enrollees, residing in the community or in institutions. Questions are asked about enrollees' patterns of health care use, charges, insurance coverage, and payments over time. Respondents are asked about their sources of health care coverage and payment, their demographic characteristics, their health and work history, and their family living circumstances. In addition to collecting information through the core questionnaire, the MCBS collects information on special topics. **Form Number:** CMS-10549 (OMB control number: 0938-1275); **Frequency:** Occasionally; **Affected Public:** Individuals or Households; **Number of Respondents:** 11,655; **Total Annual Responses:** 11,655; **Total Annual Hours:** 3,947. (For policy questions regarding this collection contact William Long at 410-786-7927.)
