

the Arrival and Departure Information System (ADIS) maintained by CBP. Nonimmigrants may utilize this information as proof of departure, which is most relevant in the land border environment, but may be utilized for departures via air and sea if desired.

As it pertains to the land environment, there is no requirement for nonimmigrants leaving the United States to report their departure to CBP. However, as described further below, CBP encourages nonimmigrants to report their departure to CBP when they exit, so that CBP can record their exit from the United States.

Although CBP routinely collects biometric data from nonimmigrants entering the United States, there currently is no comprehensive system in place to collect biometrics from nonimmigrants departing the country. Collecting biometrics at both arrival and departure will thus enable CBP and DHS to know with better accuracy whether nonimmigrants are departing the country when they are required to depart. Further, collecting biometric data will help to reduce visa or travel document fraud and improve CBP's ability to identify criminals and known or suspected terrorists. CBP has been testing various options to collect biometrics at departure in the land and air environments since 2004.

At the same time, CBP is also now working to fully automate all I-94 processes. Currently CBP issues electronic I-94s to most nonimmigrants entering the United States at land border ports of entry.

Currently CBP does not routinely staff exit lanes at land border ports of entry, nor does CBP possess a single process for nonimmigrants subject to I-94 requirements to voluntarily report their departure. Nonimmigrants can currently report their departure by any one of the following means: (1) stopping at a land border port of entry and presenting a printed copy of their electronic I-94 to a CBP officer; (2) stopping at a land border port of entry and placing a printed copy of their electronic I-94 in a drop box provided by the port where available; (3) if exiting by land on the northern U.S. border, by turning in a paper copy of their electronic I-94 to the Canadian Border Services Agency (CBSA) when entering Canada (CBSA will then return the form to CBP); or (4) mailing a copy of their electronic I-94 and other proof of departure to CBP.

The current options are burdensome and, in many cases, impractical or inconvenient due to the location and design of the ports. They also lead to haphazard record keeping and inaccurate data collection with respect

to the nonimmigrants leaving the country. Most land border ports of entry provide limited access to the port for vehicles exiting the United States and have minimal parking available to the public. For this reason, most nonimmigrants do not report their departure when exiting at land border ports of entry. In those cases, CBP has no way to confirm that a nonimmigrant has exited the United States at the time of departure. CBP often discovers that a nonimmigrant has previously left the United States at a later date, when that same nonimmigrants attempts to re-enter the United States. Having proof of an exit via the CBP One™ app would provide nonimmigrants some information for CBP officers to consider in the event the officer is unsure whether a nonimmigrant complied with the I-94 requirements provided upon their previous entry.

In addition, CBP intends to update the ESTA application website to require applicants to provide a photograph of their face, or "selfie", in addition to the photo of the passport biographical page. These photos would be used to better ensure that the applicant is the rightful possessor of the document being used to obtain an ESTA authorization.

Currently, applicants are allowed to have a third party apply for ESTA on their behalf. While this update would not remove that option, third parties, such as travel agents or family members, would be required to provide a photograph of the ESTA applicant.

The ESTA Mobile application currently requires applicants to take a live photograph of their face, which is compared to the passport photo collected during the ESTA Mobile application process. This change will better align the application processes and requirements of ESTA website and ESTA Mobile applicants.
