SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on June 23, 2023 (88 FR 41124). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: The United States is facing growing challenges related to water

availability and quality due to shifting demographics, aging water-delivery infrastructure, the impacts of climate change, and increasing hazards risks, like those posed by floods and drought. Working with incomplete knowledge, managers must consider the needs of various demographic groups and economic sectors when making management decisions and responding to emergencies. To improve delivery of effective science to support decision-making, the USGS must adapt to meet the evolving needs of stakeholders in the water-hazard space. We will collect information regarding the decision-making process and scientific information and data needs to support daily, long-term, and emergency management decision-making. A lack of decision-support data within water institutions can lead to poor decision-making and outcomes that may increase the risk to life, property, and environmental health resulting from a hazard event. This information will support the delivery of appropriate data, in appropriate formats, at the right time for decision-making and emergency management. The information will guide USGS support of water-resource institutions, enhancing resilience in the face of the Nation's many water-resources challenges.

Abstract: The Comprehensive Survey of the American Public (CSAP) is the only national information collection by the National Park Service (NPS) that describes visitors and non-visitors to units of the National Park System. Information on non-visitors, including their demographic characteristics and reasons for their non-visitation, is especially important in designing programs to reach underserved populations more effectively. The CSAP is administered every 5 years, a period determined to be long enough to identify important trends in key measures and to survey visitor and non-visitor perceptions, attitudes, behaviors, and knowledge related to the programs, services, and recreational opportunities offered by the NPS. Based on the strong mandate for social science research in support of park planning and management in the NPS Management Policies 2006 (Section 8.11.1, “Social Science Studies”), this information collection will continue to provide high-quality data required to enhance the development of programs and resources within the NPS.

Title of Collection: Comprehensive Survey of the American Public—Fourth Iteration.

OMB Control Number: 1024-0254.
Form Number: None.

Type of Review: Reinstatement of a previously approved collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Respondents: 10,578. (3,500 household survey respondents, 7,078 non-response survey respondents).

Estimated Completion Time per Response: 25 minutes: household survey; 4 minutes: non-response survey.

Total Estimated Number of Annual Burden Hours: 1,930 hours.

Respondent’s Obligation: Voluntary.

Frequency of Collection: one-time, annually.

Total Estimated Annual Nonhour Burden Cost: None.
