Proposed Consent Decree, Clean Water Act Claim

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Environmental Protection Agency (EPA) Administrator's March 18, 2022, memorandum regarding "Consent Decrees and Settlement Agreements to resolve Environmental Claims Against the Agency," notice is hereby given of a proposed consent decree in *Sierra Club, et al. v. EPA, et al.*, No. 3:24-cv-00130 (S.D.W. Va. 2024). On March 18, 2024, the Sierra Club, the West Virginia Highlands Conservancy, Inc., and the West Virginia Rivers Coalition, Inc.

(collectively, "Plaintiffs") filed a complaint in the United States District Court for the Southern District of West Virginia against EPA alleging that the Agency failed to perform a mandatory duty under the Clean Water Act (CWA) to establish Total Maximum Daily Loads (TMDLs) for certain waters located in the Lower Guyandotte River Watershed in West Virginia that are impaired due to ionic toxicity. This complaint followed Plaintiffs' submission to EPA of a Notice of Intent to Sue on March 21, 2023. EPA seeks public input on a proposed consent decree prior to its final decision-making with regard to potential settlement of the litigation.

DATES: Written comments on the proposed consent decree must be received by April 29, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OGC-2024-0145 online at <https://www.regulations.gov> (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

On March 18, 2024, Plaintiffs filed a complaint in Federal district court asserting that EPA failed to perform a mandatory duty under the CWA to establish TMDLs for certain waters located in the Lower Guyandotte River Watershed in West Virginia that are biologically impaired due to ionic toxicity (Ionic Toxicity TMDLs). This complaint followed Plaintiffs' submission to EPA of a Notice of Intent to Sue (NOI) on March 21, 2023. Following submission of the NOI, Plaintiffs and EPA initiated settlement discussions, which resulted in the proposed consent decree. Under the consent decree, EPA would be obligated to establish Ionic Toxicity TMDLs for 11 waterbody segments in the Lower Guyandotte River Watershed by January

15, 2025. In exchange, Plaintiffs would permanently release any and all claims against EPA that the Agency must establish ionic toxicity TMDLs for any other waterbody segments within the Lower Guyandotte River Watershed except for six identified waterbody segments and any waterbody segments that are listed as biologically impaired for the first time after June 1, 2023. For those six waterbody segments and any waterbody segments listed as biologically impaired for the first time after June 1, 2023, Plaintiffs would refrain from bringing any such claims against EPA until January 15, 2039. Further, Plaintiffs would not bring such claims against EPA for any West Virginia waterbody segment outside the Lower Guyandotte River Watershed until after January 15, 2025.

For a period of thirty (30) days following the date of publication of this notice, EPA will accept written comments relating to the proposed consent decree from persons who are not parties to the litigation. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments received disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the CWA.
