

Description: In August 2021, Operation Allies Welcome (OAW) was established at President Biden’s direction to implement coordinated efforts across the federal government to support vulnerable Afghans, including those who worked alongside the U.S. in Afghanistan (OAW, Homeland Security (<https://www.dhs.gov/allieswelcome>)). Under the Afghanistan Supplemental Appropriations Act, 2022, and

Additional Afghanistan Supplemental Appropriations Act, 2022, Congress authorized ORR to provide resettlement assistance and other benefits available to refugees to specific Afghan populations in response to their emergency evacuation and resettlement. ILSAA was established to provide immigration legal services to EAAs. The ILSAA EAA Intake Form and Intake Interview are designed to gather

information about EAAs who are interested in receiving legal services through ILSAA. ILSAA staff will review the EAA’s information to determine whether they meet the qualifications to receive legal services through ILSAA. This will be done on a rolling basis as EAAs seek legal services through ILSAA.

Respondents: OAW Afghan Populations.

SUPPLEMENTARY INFORMATION: In compliance with the Paperwork Reduction Act (44 U.S.C. 3506), the Administration for Community Living (ACL) has submitted the following proposed collection of information to OMB for review and clearance. The Administration for Community Living (ACL) at the Department of Health and Human Services (HHS) is requesting a generic clearance for purposes collecting data with a focus on the awareness, understanding, attitudes, preferences, or experiences of customers or other stakeholders relating to existing or future services, products, or communication materials. ACL defines routine customer feedback as information that provides useful insights to improve existing or future service deliveries, products, or communication materials. ACL is requesting approval for customer surveys with the purpose of the collecting data to assist the agency in improving existing or future service deliveries, products, or communication

materials; responses are voluntary: the collection does not impose a significant burden on respondents; the collection does not employ statistical methods to have practical utility; and the data results are not publicly shared.

The types of information collection activities will include:

1. Customer Comment Card/Complaint Form
2. Customer Satisfaction Qualitative Surveys
3. Technical Assistance
4. Usability Testing (e.g., Website or Software)
5. Small Discussion Group
6. Focus Group
7. One-time or panel discussion groups
8. Moderated, un-moderated, in-person, and/or remote-usability studies
9. Testing of a survey or other collection to refine questions
10. Post-transaction customer surveys
11. On-line surveys

ACL was created around the fundamental principle that older adults and people of all ages with disabilities should be able to live where they choose, with the people they choose, and with the ability to participate fully in their communities. By funding services and supports provided primarily by networks of community-based organizations, and with investments in research, education, and innovation, ACL helps make this principle a reality for millions of Americans. Integral to this role, ACL will use this mechanism to conduct routine customer feedback for ACL programs.
