

aids; technical publications/data; U.S. Government and contractor engineering, technical and logistical support services; and other related elements of logistical and program support. The estimated total program cost is \$450 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a major ally that is a force for political stability and economic progress in the Asia-Pacific region.

The proposed sale will improve Japan's Air Defense and Ballistic Missile Defense capabilities against potential adversaries in the region. It will also provide the U.S.-Japan Security Alliance with the latest and most advanced capabilities, reducing Japan's reliance on U.S. Forces for the defense of Japan and further improving U.S. Japan military interoperability. Japan will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missiles and Defense (RMD), Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require U.S. Government and contractor personnel to visit Japan on a temporary basis in conjunction with program technical oversight and support requirements, including program and technical reviews, as well as to provide training and maintenance support in Japan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 22-59

Notice of Proposed Issuance of Letter of Offer

Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Standard Missile-6 (SM-6) is a surface Navy Anti-Air Warfare missile that provides area and ship self-defense. The missile is intended to project power and contribute to raid annihilation by destroying manned fixed and rotary wing aircraft, Unmanned Aerial Vehicles (UAV), Land Attack Cruise Missiles, and Anti-Ship Cruise Missiles in flight. It was designed to fulfill the need for a vertically launched, extended range missile compatible with the

AEGIS Weapon System to be used against extended range threats at-sea, near land, and over land. The SM-6 combines the tested legacy of STANDARD Missile-2 (SM-2) propulsion and ordnance with an active Radio Frequency seeker allowing for over-the-horizon engagements, enhanced capability at extended ranges, and increased firepower.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Japan can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Japan.

BILLING CODE 6001-FR-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Withdrawal of Notice of Intent (NOI) To Prepare a Draft Environmental Impact Statement for the Amite River and Tributaries-East of the Mississippi River, Louisiana, Flood Risk Management Feasibility Study

AGENCY: Corps of Engineers, Department of the Army, Department of Defense.

ACTION: Notice of intent; withdrawal.

SUMMARY: The U.S. Army Corps of Engineers (USACE) is issuing this notice to advise Federal, State, and local governmental agencies and the public that USACE is withdrawing the notice of intent for the preparation of the Draft Environmental Impact Statement (DEIS) for the Amite River and Tributaries-East of the Mississippi River, Louisiana, Flood Risk Management Feasibility Study, which was published in the **Federal Register** on April 2, 2019. Since publication of the NOI, the USACE released a Draft Integrated Feasibility

Report and Environmental Impact Statement (DIFR/EIS) associated with this study on November 26, 2019 for concurrent public, technical, legal, and policy review. The USACE, after further evaluation of potential impacts, determined the revised (and current) TSP is not likely to result in significant impacts requiring the preparation of an EIS. The USACE therefore prepared the Supplemental Second Draft Integrated Feasibility Report with Environmental Assessment #600 (SSDIFR/EA) that was made available for a 45-day public review starting on December 15, 2023.

DATES: The notice of intent to prepare an EIS published in the **Federal Register** on April 4, 2019 (84 FR 12602), is withdrawn as of August 8, 2024.

ADDRESSES: Department of the Army, U.S. Army Corps of Engineers, New Orleans District, 7400 Leake Avenue New Orleans, LA 70118-3651.

FOR FURTHER INFORMATION CONTACT: Questions about the withdrawal of the Notice of Intent can be directed to Jordan Logarbo, at (504) 862-1158 or Jordan.r.logarbo@usace.army.mil.

SUPPLEMENTARY INFORMATION: The study's purpose is to investigate flood risk reduction alternatives to reduce flood damages from rainfall in the Amite River Basin (ARB). The study is authorized by the Resolution of the Committee on Public Works of the United States Senate, adopted on April 14, 1967. The report is funded through Public Law 115-123 (the Bipartisan Budget Act of 2018).

A DIFR/EIS for this study was released on November 26, 2019, for concurrent public, technical, legal, and policy review. It evaluated four alternatives as a part of its final array, which included two dams, and a nonstructural plan in its final array. The TSP of the 2019 DIFR/EIS was an estimated \$2.3 billion-dollar new large-scale dry dam with a nonstructural component to address residual risk over a 2200 mi² study area. During review, the TSP was identified to have extensive technical and policy concerns, which found the dam was constrained by site conditions that made it in-feasible as designed and potentially increased life safety risk.

Due to these concerns the USACE re-evaluated critical tasks to inform the decision on the revised tentatively selected plan, a nonstructural-only plan for voluntary elevation of eligible residential structures and floodproofing of eligible nonresidential structures. The USACE does not anticipate that this revised TSP would have impacts requiring the preparation of an EIS. This was documented in the SSDIFR/EA. The

SSDIFR/EA was made available on the Amite River and Tributaries Feasibility Study website (<https://www.mvn.usace.army.mil/Amite-River-and-Tributaries/>) for a 45-day public review and comment period beginning on December 15, 2023 and ending on January 29, 2024.

James A. Bodron,

Programs Director, Mississippi Valley Division.

BILLING CODE 3720–58–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0074]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; National Center for College Students With Disabilities (NCCSD) Database of Disability Services and Activities in Higher Education

AGENCY: Office of Postsecondary Education (OPE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before September 9, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link www.reginfo.gov/public/do/PRAMain to access the site. Find this information collection request (ICR) by selecting “Department of Education” under “Currently Under Review,” then check the “Only Show ICR for Public Comment” checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the “View Information Collection (IC) List” link. Supporting statements and other supporting documentation may be found by clicking on the “View Supporting Statement and Other Documents” link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Shedita Alston, 202–453–7090.

SUPPLEMENTARY INFORMATION: The Department is especially interested in

public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: National Center for College Students with Disabilities (NCCSD) Database of Disability Services and Activities in Higher Education.

OMB Control Number: 1840–0841.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 5,916.

Total Estimated Number of Annual Burden Hours: 17,748.

Abstract: The National Center for College Students with Disabilities (NCCSD) at the University of Minnesota and originated by the Association on Higher Education and Disability (AHEAD) is authorized by Congress in the Higher Education Opportunity Act of 2008 (777.4) and was established in 2016. The NCCSD College Disability Resource Database is designed to address a gap in information about services and accessibility for college students with disabilities, who make up 19.5% of the undergraduate population. Existing general information about colleges is available in the Department of Education’s online College Navigator and College Affordability and Transparency Center, but the only information about students with disabilities in these databases is the percentage of students registered with campus disability services offices. At this time, this is the only database that provide systematic collection of information about campus-level disability-related services, access, and activities at colleges and universities in the United States. The NCCSD survey asks all U.S. campuses to provide basic information about disability services, accessibility of campus, and disability-related activities that may affect inclusion and the campus climate. The data is available to the public in an accessible and searchable database to help prospective college students and their families make informed decisions during the college search process.

Because the database is public, researchers and policymakers are able to utilize the data to gather information about disability and higher education in systematic ways.

The Department is requesting a revision of the survey for the following reasons: to add non-degree-granting institutions of higher education to the respondent universe; to change the timeframe for and revise one question; to revise the possible responses to one question; and to add three new questions regarding faculty/instructor disability training.

Dated: August 5, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.
