SUPPLEMENTARY INFORMATION:

Title of Collection: Schools of National Service Commitment Form.

OMB Control Number: 3045-0143.

Type of Review: Revision.

Respondents/Affected Public: Businesses and Organizations.

Total Estimated Number of Annual Responses: 200.

Total Estimated Number of Annual Burden Hours: 100.

Abstract: The Schools of National Service initiative, formerly the Segal Education Award Matching Program, helps higher education and post-secondary institutions connect with AmeriCorps alumni. To qualify as a School of National Service, the institution must complete a commitment form, committing to provide one or more incentives to AmeriCorps members and alumni seeking to attend their institution. This collection allows AmeriCorps and the institution to enhance the educational opportunities available to AmeriCorps alumni because of their service. AmeriCorps is seeking to revise the commitment form to add checkbox options for career and technical education (CTE) and other program types the institution may offer; add checkbox options for whether programs are offered online, in person, or both; and add a field for the institution to indicate whether it offers benefits to senior citizens and at what age eligibility begins. The revision would also delete the entry for the percentage of education award that the institution will match for AmeriCorps alumni it accepts for admission to the institution. AmeriCorps also seeks to continue using the currently approved information collection until the revised information collection is approved by OMB. The currently approved information collection is due to expire on March 31, 2025.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d)

ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. Federal Energy Regulatory Commission

[Docket No. CP25-25-000]

ANR Pipeline Company; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on November 25, 2024, ANR Pipeline Company (ANR), 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205 and 157.210 of the Commission's regulations under the Natural Gas Act (NGA), and ANR's blanket certificate issued in Docket No. CP82-480-000, for authorization to modify and restate the certificated horsepower of its Bridgman Compressor Station in Berrien County,

Michigan. In February 2021, pursuant to section 2.55(b)(1)(iii) of the Commission's regulations, ANR notified the Commission of its intent to replace all existing compressor units at its Bridgman Compressor Station with two turbine compressor units with a combined nameplate rating of 26,983 horsepower (HP) based on the latest standards by the International Organization for Standardization (ISO) (2021 Turbine Units). ANR determined that controls limiting the 2021 Turbine Units were unnecessary because, at maximum output, the 2021 Turbine Units provided substantially equivalent design delivery capacity as the previous units. ANR states that the Bridgman Compressor Station was originally certificated at 23,050 HP based on varying nameplate rating standards for the historical units; this is equivalent to 27,058 HP when converted to the latest ISO horsepower rating. As this is substantially equivalent to the 2021 Turbine Units' ISO rating of 26,983 HP, ANR proposes to modify and restate the total certificated horsepower at the Bridgman Compressor Station from 23,050 HP to 26,983 HP to accurately reflect the maximum ISO horsepower provided by the 2021 Turbine Units, all as more fully set forth in the request which is on file with the Commission and open to public inspection.
