

Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,<sup>2</sup> the Commission will aim to issue an order acting on the request within 45 days.<sup>3</sup> The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.<sup>4</sup> The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).<sup>5</sup> At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.<sup>6</sup> The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

#### **New England Hydropower Company, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications**

On February 6, 2025, New England Hydropower Company, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Eastvale Dam Hydroelectric Project (Eastvale Project) on the Beaver River in Beaver County, near the City of Beaver Falls in Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant

The proposed Eastvale Project would consist of the following: (1) an existing 490-foot-long, 12.5-foot-high concrete-lined dam with an overflow crest elevation of 730.7 feet mean sea level (msl); (2) an existing impoundment; (3) three new 24-foot-wide, 87-foot-long turbine bays each housing two turbine-generator units—each unit with a capacity of 350 kilowatts (kW) for a total capacity of 2,100 kW; (4) a new 16-foot-wide, 35-foot-long electrical control building; (5) a new 100-foot-long transmission line; and (6) appurtenant facilities. The proposed project would have an annual generation of 9,200 megawatt-hours.
