

Cleanup Project (ICP) as the DOE official who is responsible for the operation and nuclear safety of the FSV ISFSI and for ensuring its compliance with NRC license conditions and regulatory requirements. TS 5.1.1 currently designates the Deputy Manager for the ICP as the DOE official who is responsible for the operation of the FSV ISFSI and for ensuring its compliance with NRC license conditions and regulatory requirements. The proposed amendment would also revise TS 5.6.1 so that it identifies the Manager for the ICP, rather than the Deputy Manager, as one of the two DOE officials who are responsible for submitting certain reports that are required in connection with the license. Additionally, the proposed amendment would correct clerical drafting errors in TS 3.3.1 and 5.5.2.6 so that those technical specifications accurately reflect changes that were previously approved and included in License Amendment 10 but

were inadvertently omitted from License Amendment 11. The proposed amendment would also correct an erroneous regulatory citation in TS 5.5.1.d, correct a typographical error in TS 5.5.2.5, and adjust references to relevant organizational components of DOE in License Condition 14 and in TS 5.1.5, 5.4.2, and 5.5.2.7.

In a letter to DOE dated March 21, 2025, the NRC notified DOE that the application was acceptable to begin a technical review. The NRC's Office of Nuclear Material Safety and Safeguards has docketed this application under Docket No. 72-09, and the NRC is issuing this notice of docketing as authorized and required by 10 CFR 72.16(e). The NRC will approve the license amendment if it finds that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and the NRC's regulations, and the NRC will make findings consistent with the National

Environmental Policy Act and part 51 of title 10 of the *Code of Federal Regulations* (10 CFR). These findings will be documented in a safety evaluation report. The NRC may issue either a notice of hearing or a notice of proposed action and opportunity for hearing in accordance with 10 CFR 72.46(b)(1) or, if a determination is made that the amendment does not present a genuine issue as to whether the health and safety of the public will be significantly affected, take immediate action on the amendment in accordance with 10 CFR 72.46(b)(2) and then promptly provide notice of the action taken and an opportunity for interested persons to request a hearing on whether the action should be rescinded or modified.
