

Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

On August 29, 2024, the Commission released a Report and Order, WT Docket No. 22–323, *Spectrum Rules and Policies for the Operation of Unmanned Aircraft Systems*, FCC 24–91 (90 FR 1380, January 8, 2025). Among the adopted rules intended to enable uncrewed aircraft systems (UAS)

operators to access dedicated, reliable spectrum in the 5030–5091 MHz band to support safety-of-flight, control-related communications, while also allowing flexibility for the industry to further develop, the Commission added new rules in 47 CFR part 88 and revised Form 731, the Application for Equipment Authority. These new rules provide a critical first step to promote access by UAS operators to dedicated spectrum, while also allowing a consensus to emerge on key issues for this industry.

These new rules resulting in revisions to the information collection are as follows:

#### **§ 88.111 Certification Required**

Each transmitter utilized for operation under this part and each transmitter marketed as set forth in § 2.803 of this chapter must be certified by the Commission for use in part 88 services following the procedures set forth in part 2, subpart J of this chapter.

#### **§ 88.113 Authorization of Equipment**

An applicant for certification of equipment intended for transmission in the 5030–5091 MHz band must notify the FAA of the filing of a certification application. The letter of notification must be mailed to: Federal Aviation Administration (FAA), Spectrum Engineering Service Group, AJW–1900, 800 Independence Ave. SW, Washington, DC 20591 prior to the filing of the application with the Commission.

(a) The notification letter must describe the equipment, and give the manufacturer's identification, antenna characteristics, rated output power, emission type and characteristics, the frequency or frequencies of operation, and essential receiver characteristics if protection is required.

(b) The certification application must include a copy of the notification letter to the FAA. The Commission will not act until it receives the FAA's determination regarding whether it objects to the application for equipment authorization. The FAA should mail its determination to: Office of Engineering and Technology Laboratory Division, Equipment Authorization and Compliance Branch, 7435 Oakland Mills Rd., Columbia, MD 21046. The Commission will consider the FAA determination before taking final action on the application.

#### **§ 88.115 RF Safety**

Licensees and manufacturers are subject to the radio frequency radiation exposure requirements specified in §§ 1.1307(b), 1.1310, 2.1091, and 2.1093 of this chapter, as appropriate.

Applications for equipment authorization of mobile or portable devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions and technical information showing the basis for this statement must be submitted to the Commission upon request.
