

the case of a qualified facility which is equipped with a metering device which is owned and operated by an unrelated person, sold, consumed, or stored by the taxpayer during the taxable year, multiplied by (2) the applicable amount with respect to such qualified facility.

For purposes of the applicable amount used in calculating the section 45Y credit, section 45Y(a)(2) provides a base amount and a higher alternative amount. Section 45Y(a)(2)(A) provides that, subject to section 45Y(g)(7) (providing an increase in credit for qualified facilities located in an energy community), the applicable amount will be the base amount of 0.3 cents in the case of a qualified facility that does not satisfy the requirements for the alternative amount. Section 45Y(a)(2)(B) provides that, subject to section 45Y(g)(7), the applicable amount will be the alternative amount of 1.5 cents in the case of any qualified facility (1) with a maximum net output of less than 1 megawatt (as measured in alternating current), (2) the construction of which begins prior to the date that is 60 days after the Secretary of the Treasury or the Secretary's delegate (Secretary) publishes guidance on the requirements of section 45Y(g)(9) (wage requirements) and section 45Y(g)(10) (apprenticeship requirements),¹ or (3) that satisfies section 45Y(g)(9) and, with respect to the construction of such facility, satisfies section 45Y(g)(10).

Section 45Y(c)(1) provides for an inflation adjustment for both the base and alternative amounts. Section 45Y(c)(1) provides that, in the case of a calendar year beginning after 2024, the

0.3 cent amount in section 45Y(a)(2)(A) and the 1.5 cent amount in section 45Y(a)(2)(B) will each be adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale, consumption, or storage of the electricity occurs. If the 0.3 cent amount as adjusted for inflation is not a multiple of 0.05 cent, such amount is rounded to the nearest multiple of 0.05 cent. If the 1.5 cent amount as adjusted for inflation is not a multiple of 0.1 cent, such amount is rounded to the nearest multiple of 0.1 cent.

Section 45Y(c)(2) requires the Secretary to determine and publish in the **Federal Register** each calendar year the inflation adjustment factor for such calendar year.

Section 45Y(c)(3) defines the term *inflation adjustment factor* as, with respect to a calendar year, a fraction, the numerator of which is the GDP implicit price deflator for the preceding calendar year and the denominator of which is the GDP implicit price deflator for the calendar year 1992. The term *GDP implicit price deflator* means the most recent revision of the implicit price deflator for the gross domestic product as computed and published by the Department of Commerce before March 15 of the calendar year.

Inflation Adjustment Factor for Calendar Year 2025: For purposes of section 45Y(c)(1), for sales, consumption, or storage of electricity occurring in calendar year 2025, the inflation adjustment factor is a fraction, the numerator of which is the GDP implicit price deflator for 2024 (125.234) and the denominator of which is the GDP implicit price deflator for 1992 (62.707), which yields an inflation adjustment factor of 1.9971. Accordingly, the inflation adjustment factor for calendar year 2025 for purposes of the section 45Y credit is 1.9971.

Applicable Amounts for Calendar Year 2025: Under the calculation required by section 45Y(c)(1), for sales, consumption, or storage of electricity occurring in calendar year 2025, the applicable amount provided in section 45Y(a)(2)(A) is 0.6 cents (or \$0.006). For sales, consumption, or storage of electricity occurring in calendar year 2025, the applicable amount provided in section 45Y(a)(2)(B) is 3 cents (or \$0.03).

(Authority: Section 45Y(c)(2) of the Internal Revenue Code (26 U.S.C. 45Y(c)(2)).)

Stephanie N. Bland,

Deputy Associate Chief Counsel, (Energy, Credits, and Excise Tax).
