SUPPLEMENTARY INFORMATION:

A. Purpose

The General Services Administration Acquisition Regulation (GSAR) 552.236-79, Construction-Contractor-as-Constructor, requires the contractor to submit a proposal to establish the final estimated cost of the work, to convert the contract to a firm-fixed-price, and to determine the final settlement for construction-manager-as-constructor (CMc) projects.

The CMc refers to a project management and contracting technique that is one of three predominant methods used for acquiring construction services by GSA. The other two methods are design-bid-build and design-build. The private sector commonly uses a similar construction project delivery method, which allows for early industry engagement by the construction contractor to enable reduced cost growth, reduced schedule growth, and administrative savings.

The information is used by contracting officers to evaluate proposals and negotiate contract modifications during contract administration. This collection supports the Government's shift toward category management by providing a more robust playbook framework for efficient procurement of construction services.

B. Annual Reporting Burden

Total public reporting burden for this collection of information is estimated to average 400 total hours (\$33,300) annually, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. The estimated burden hours to the public for the below clauses are as follows:
