Great Lakes Hydro America, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Great Lakes Hydro America, LLC's application for a temporary variance of the license for the Mattaceunk Hydroelectric Project No. 2520 and has prepared an Environmental Assessment (EA) for the project.¹ The licensee proposes to draw the impoundment down to perform repair to the upstream fishway and log sluice at the Mattaceunk Project, replace the sluice gate due to deterioration, and perform concrete repairs to the leaking slots immediately downstream of the

sluice gate. The fishway maintenance work is necessary in preparation for upcoming and required evaluations of the fishway for upstream Gulf of Maine Distinct Population Segment of Atlantic salmon passage that begins in 2026. The project is located on the Penobscot River, in Aroostook and Penobscot counties, Maine and does not occupy federal land.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed temporary variance, alternatives to the proposed action, and concludes that the temporary variance, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "elibrary" link. Enter the docket number (P–2520) in the docket number field to access the document.
