

Petitioner: Century Mining, LLC, 7004 Buckhannon Road, Volga, WV 26238.

Mine: Longview Mine, MSHA ID No. 46-09447, located in Barbour County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Installation of electric equipment and conductors; permissibility.

Modification Request: The petitioner requests a modification of the existing standard, 30 CFR 75.1002(a), as it relates to the use of an alternative method of respirable dust protection at the Longview Mine. Specifically, the petitioner is applying to use the battery powered respirable protection unit 3M Versaflo TR-800 within 150 feet of pillar workings or longwall faces as an alternative to the now discontinued 3M Airstream.

The petitioner states that:

(a) The petitioner is seeking an alternative to the 3M Airstream helmet to provide miners with respirable protection against coal mine dust, a protection that can provide long-term health benefits.

(b) The 3M Airstream helmet has been used in mines for over 40 years. 3M has recently faced component disruptions for the Airstream product. This has caused 3M to discontinue, globally, the Airstream on June 1, 2020. The ability to order an Airstream system and components ended in February 2020 and components were available through June 2020.

(c) Currently, there are not any available replacement PAPRs (positive pressure air-purifying respirators) that meet the MSHA standard for permissibility.

(d) PAPRs provide a constant flow of filtered air, which offers respiratory protection and comfort in hot working environments.

(e) Operators that were using the Airstream do not have an alternative to provide this type of protection to its miners.

(f) 3M Versaflo TR-800:

(1) The TR-800 is a PAPR blower with battery rated at Division I for Classes I, II, and III under the most current UL standard (UL 60079, 6th Edition, 2013); NIOSH-approved PAPR system. The 3M Versaflo Powered Air Purifying Respirator TR-800 Motor/Blower, with the 3M Battery Pack TR-830 attached, has been tested and classified for intrinsic safety in Hazardous Locations (Exia) by Underwriters Laboratory (UL) for the following: Exia Division 1: IS Class I, II, III; Division 1(Includes Division 2), Groups C, D, E, F, G; T4; Ex ia I Ma; Class I, Zone 0, AEx ia IIB, T4; Class I, Zone 0, Ex ia IIB, T4; Zone 20, AEx ia

IIIC, T135; Zone 20, Ex ia IIIC, T135; $-20\text{ }^{\circ}\text{C} \leq \text{Ta} \leq 55\text{ }^{\circ}\text{C}$.

(g) This unit is not MSHA approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

The petitioner proposes the following alternative method:

(a) Affected mine employees will be trained in the proper use and maintenance of the PAPR in accordance with the established manufacturer guidelines. In addition to manufacturer guidelines, it will be required that mine employees be trained to inspect the unit before each use to determine if there is any damage or defects to the unit that would negatively impact intrinsic safety. This inspection shall include all associated wiring and connections and shall take place prior to the equipment being taken underground.

(b) If, during the inspection, it is determined that there is damage that may negatively impact the intrinsic safety, the PAPR will be immediately removed from service.

(c) The PAPR user shall conduct daily examinations of the filter and replace as needed.

(d) When fitting a new filter on the PAPR, the manufacturer's instructions will be followed.

(e) PAPR units will not be charged underground.

(f) A qualified person under 30 CFR 75.151 will monitor for methane as is required by the standard in the affected areas of the mine.

(g) All requirements of 30 CFR 75.323 shall be complied with. The PAPR shall not be used if methane is detected in concentrations at or above 1.0 percent methane. When 1.0 percent or more methane is detected while the PAPR is being used, the equipment shall be de-energized immediately. When 1.5 percent or more methane is detected, the PAPR shall be withdrawn from the affected area outby the last open crosscut.

(h) Employees will be trained on how to properly use and take care of the PAPR according to manufacturer guidelines as well as all stipulations as related to the Proposed Decision and Order (PDO) granted by MSHA. Qualified miners will receive training regarding the information in the PDO granted by MSHA before using equipment in the relevant part of the mine. A record of the training will be kept and available upon request. Within 60 days of the PDO granted by MSHA becoming finalized, the petitioner will submit proposed revisions to 30 CFR

75.370, mine ventilation, to be approved under the 30 CFR part 48 training plan by the Coal Mine Safety and Health District Manager. The revisions will specify initial and refresher training and when the training is conducted, an MSHA Certificate of Training (Form 5000-23) will be completed. Comments will be made on the certificate to note non-permissible testing equipment training.

There are no representatives of miners at Century Mining, LLC, Longview Mine. A copy of this petition has been posted on the bulletin board as of August 28, 2025.

In support of the proposed alternative method, the petitioner has also submitted specification tables for the 3M Versaflo TR-800 PAPR.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Jessica D. Senk,

Acting Director, Office of Standards, Regulations, and Variances.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Century Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before October 15, 2025.

ADDRESSES: You may submit comments identified by Docket No. MSHA-2025-0323 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA-2025-0323.

2. *Fax:* 202-693-9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, Room C3522, 200 Constitution Ave. NW, Washington, DC 20210.

Attention: Jessica D. Senk, Acting Director, Office of Standards,

Regulations, and Variances. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202-693-9440 to make an appointment.

FOR FURTHER INFORMATION CONTACT:

Jessica D. Senk, Office of Standards, Regulations, and Variances at 202-693-9440 (voice), Petitionsformodification@dol.gov (email), or 202-693-9441 (fax). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M-2025-054-C.

Petitioner: Century Mining, LLC, 7004 Buckhannon Road, Volga, WV 26238.

Mine: Longview Mine, MSHA ID No. 46-09447, located in Barbour County, West Virginia.

Regulation Affected: 30 CFR 75.500(d), Permissible electric equipment.

Modification Request: The petitioner requests a modification of the existing standard, 30 CFR 75.500(d), as it relates to the use of an alternative method of respirable dust protection at the Longview Mine. Specifically, the petitioner is applying to use the battery powered respirable protection unit 3M Versaflo TR-800 in or inby the last open crosscut as an alternative to the now discontinued 3M Airstream.

The petitioner states that:

(a) The petitioner is seeking an alternative to the 3M Airstream helmet to provide miners with respirable protection against coal mine dust, a

protection that can provide long-term health benefits.

(b) The 3M Airstream helmet has been used in mines for over 40 years. 3M has recently faced component disruptions for the Airstream product. This has caused 3M to discontinue, globally, the Airstream on June 1, 2020. The ability to order an Airstream system and components ended in February 2020 and components were available through June 2020.

(c) Currently, there are not any available replacement PAPRs (positive pressure air-purifying respirators) that meet the MSHA standard for permissibility.

(d) PAPRs provide a constant flow of filtered air, which offers respiratory protection and comfort in hot working environments.

(e) Operators that were using the Airstream do not have an alternative to provide this type of protection to its miners.

(f) 3M Versaflo TR-800:

(1) The TR-800 is a PAPR blower with battery rated at Division I for Classes I, II, and III under the most current UL standard (UL 60079, 6th Edition, 2013); NIOSH-approved PAPR system. The 3M Versaflo Powered Air Purifying Respirator TR-800 Motor/Blower, with the 3M Battery Pack TR-830 attached, has been tested and classified for intrinsic safety in Hazardous Locations (Exia) by Underwriters Laboratory (UL) for the following: Exia Division 1: IS Class I, II, III; Division 1 (Includes Division 2), Groups C, D, E, F, G; T4; Ex ia I Ma; Class I, Zone 0, AEx ia IIB, T4; Class I, Zone 0, Ex ia IIB, T4; Zone 20, AEx ia IIIC, T135; Zone 20, Ex ia IIIC, T135; $-20\text{ }^{\circ}\text{C} \leq \text{Ta} \leq 55\text{ }^{\circ}\text{C}$.

(g) This unit is not MSHA approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

The petitioner proposes the following alternative method:

(a) Affected mine employees will be trained in the proper use and maintenance of the PAPR in accordance with the established manufacturer guidelines. In addition to manufacturer guidelines, it will be required that mine employees be trained to inspect the unit before each use to determine if there is any damage or defects to the unit that would negatively impact intrinsic safety. This inspection shall include all associated wiring and connections and shall take place prior to the equipment being taken underground.

(b) If, during the inspection, it is determined that there is damage that may negatively impact the intrinsic safety, the PAPR will be immediately removed from service.

(c) The PAPR user shall conduct daily examinations of the filter and replace as needed.

(d) When fitting a new filter on the PAPR, the manufacturer's instructions will be followed.

(e) PAPR units will not be charged underground.

(f) A qualified person under 30 CFR 75.151 will monitor for methane as is required by the standard in the affected areas of the mine.

(g) All requirements of 30 CFR 75.323 shall be complied with. The PAPR shall not be used if methane is detected in concentrations at or above 1.0 percent methane. When 1.0 percent or more methane is detected while the PAPR is being used, the equipment shall be de-energized immediately. When 1.5 percent or more methane is detected, the PAPR shall be withdrawn from the affected area outby the last open crosscut.

(h) Employees will be trained on how to properly use and take care of the PAPR according to manufacturer guidelines as well as all stipulations as related to the Proposed Decision and Order (PDO) granted by MSHA. Qualified miners will receive training regarding the information in the PDO granted by MSHA before using equipment in the relevant part of the mine. A record of the training will be kept and available upon request. Within 60 days of the PDO granted by MSHA becoming finalized, the petitioner will submit proposed revisions to 30 CFR 75.370, mine ventilation, to be approved under the 30 CFR part 48 training plan by the Coal Mine Safety and Health District Manager. The revisions will specify initial and refresher training and when the training is conducted, an MSHA Certificate of Training (Form 5000-23) will be completed. Comments will be made on the certificate to note non-permissible testing equipment training.

There are no representatives of miners at Century Mining, LLC, Longview Mine. A copy of this petition has been posted on the bulletin board as of August 28, 2025.

In support of the proposed alternative method, the petitioner has also submitted specification tables for the 3M Versaflo TR-800 PAPR.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection

afforded the miners under the mandatory standard.

Jessica D. Senk,

Acting Director, Office of Standards, Regulations, and Variances.

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report of Rescissions Proposals Pursuant to the Congressional Budget and Impoundment Control Act of 1974

AGENCY: Executive Office of the President, Office of Management and Budget.

ACTION: Notice of monthly cumulative report pursuant to the Congressional Budget and Impoundment Control Act of 1974.

SUMMARY: Pursuant to the Congressional Budget and Impoundment Control Act of 1974, OMB is issuing a monthly cumulative report (for September 2025) from the Director detailing the status of rescission proposals that were previously transmitted to the Congress on June 3, 2025 and August 28, 2025.

DATES: Release Date: September 10, 2025.

ADDRESSES: The September 2025 cumulative report is available on-line on the OMB website at: <https://www.whitehouse.gov/omb/information-resources/legislative/supplementals-amendments-and-releases/>.

FOR FURTHER INFORMATION CONTACT:

Jason Hoffman, 252 Eisenhower Executive Office Building, Washington, DC 20503, Email address:

Jason.M.Hoffman@omb.eop.gov, telephone number: (202) 456–1414. Because of delays in the receipt of regular mail related to security screening, respondents are encouraged to use electronic communications.

Russell T. Vought,

Director.

BILLING CODE 3110–01–P

NUCLEAR REGULATORY COMMISSION

729th Meeting of the Advisory Committee on Reactor Safeguards (ACRS)

In accordance with the purposes of Sections 29 and 182b of the Atomic Energy Act (42 U.S.C. 2039, 2232(b)),

the Advisory Committee on Reactor Safeguards (ACRS) will hold meetings on October 10, 2025. In addition, the ACRS is implementing Section 4.(b) of Executive Order (E.O.) 14300, “Ordering the Reform of the Nuclear Regulatory Commission,” dated May 23, 2025, which states, in part, that the functions of the ACRS shall be reduced to the minimum necessary to fulfill ACRS’s statutory obligations and that review by ACRS of permitting and licensing issues shall focus on issues that are truly novel and noteworthy. The ACRS will only undertake other work as directed by the Commission in accordance with Sections 29 and 182b of the Atomic Energy Act.

The Committee will be conducting meetings that will include some Members being physically present at the headquarters of the U.S. Nuclear Regulatory Commission (NRC) while other Members participate remotely. Interested members of the public are encouraged to participate remotely in any open sessions via Microsoft Teams or via phone at 301–576–2978, passcode 596544454#. A more detailed agenda, including the Microsoft Teams link, may be found at the ACRS public website at <https://www.nrc.gov/reading-rm/doc-collections/acrs/agenda/index.html>. If you would like the Microsoft Teams link forwarded to you, please contact the Designated Federal Officer (DFO) as follows: Quynh.Nguyen@nrc.gov, or Lawrence.Burkhart@nrc.gov.

Friday, October 10, 2025

8:30 a.m.–8:35 a.m.: Opening Remarks by the ACRS Chairman (Open)—The ACRS Chairman will make opening remarks regarding the conduct of the meeting.

8:35 a.m.–5:30 p.m.: Palisades Nuclear Plant Restart Activities—Steam Generator Operational Assessment Discussion/Planning and Procedures Session/Future ACRS Activities/Preparation of Reports (Open/Closed)—The Committee will have discussions with the NRC staff regarding the subject topics and hear discussion of the recommendations of the Planning and Procedures Subcommittee regarding items proposed for consideration by the Full Committee during future ACRS meetings, and/or proceed to preparation of reports. [Note: Pursuant to 5 U.S.C. 552b(c)(2), a portion of this meeting may be closed to discuss organizational and personnel matters that relate solely to internal personnel rules and practices of the ACRS.]

[Note: Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed

in order to discuss and protect information designated as proprietary.]

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on July 22, 2025 (90 FR 34522). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Persons desiring to make oral statements should notify Quynh Nguyen, Cognizant ACRS Staff and the DFO (Telephone: 301–415–5844, Email: Quynh.Nguyen@nrc.gov), 5 days before the meeting, if possible, so that appropriate arrangements can be made to allow necessary time during the meeting for such statements. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the cognizant ACRS staff if such rescheduling would result in major inconvenience.

An electronic copy of each presentation should be emailed to the cognizant ACRS staff at least three days before the meeting.

In accordance with Subsection 10(d) of Public Law 92–463 and 5 U.S.C. 552b(c), certain portions of this meeting may be closed, as specifically noted above. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chairman. Electronic recordings will be permitted only during the open portions of the meeting.

ACRS meeting agendas, meeting transcripts, and letter reports are available through the NRC Public Document Room (PDR) at pdr.resource@nrc.gov, the ACRS public website, or by calling the PDR at 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern daylight time, Monday through Friday, except Federal holidays, or from the Publicly Available Records System component of NRC’s Agencywide Documents Access and Management System, which is accessible from the NRC website at <https://www.nrc.gov/reading-rm/adams.html> or <https://www.nrc.gov/reading-rm/doc-collections/#ACRS/>

Dated: September 11, 2025.

For the Nuclear Regulatory Commission.

Russell E. Chazell,

Federal Advisory Committee Management Officer, Office of the Secretary.
