SUPPLEMENTARY INFORMATION:

Title: Process for a Swap Execution Facility or Designated Contract Market to Make a Swap Available to Trade (OMB Control No. 3038-0099). This is a request for extension of a currently approved information collection.

Abstract: The collection of information is needed to help determine which swaps should be subject to the trade execution requirement set forth in section 2(h)(8) of the Commodity Exchange Act. A swap execution facility ("SEF") or designated contract market ("DCM") that submits a determination that a swap is available to trade must address at least one of several factors demonstrating that the swap is suitable for trading pursuant to the trade execution requirement. The Commission uses the collection of information to facilitate the application of the trade execution requirement and requirements associated with methods of swap execution under Parts 37 and 38 of the Commission's regulations.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. On July 3, 2025, the Commission published in the **Federal Register** notice of the proposed extension of this information collection and provided 60 days for public comment on the proposed extension, 90 FR 29533 (60-Day Notice). The Commission received one comment from a member of the public. The comment did not address the Commission's request for comment on ways to minimize burden and improve the utility of the collection. The comment suggested erroneously that "CFTC is not associated with rule

making and the OMB identification number is not correct or associated with the OMB master number.” This collection is, however, associated with the Commission regulations establishing a process for swap execution facilities and designated contract markets to make a swap “available to trade” for purposes of the trade execution requirement. Moreover, the collection has received approval from OMB.

Burden Statement: Sections 37.10 and 38.12 of the Commission’s regulations include information collection requirements within the meaning of the PRA. These regulations permit a SEF or DCM to submit a determination that a swap is available to trade to the Commission via filing procedures set forth in Part 40 of the Commission’s regulations. The Commission estimates the burden of reviewing the prescribed factors and data to make a determination for this collection to be 16 hours per response.

Respondents/Affected Entities: SEFs, DCMs.

Estimated Number of Respondents: 3.

Estimated Average Burden Hours per Respondent: 16.

Estimated Total Annual Burden Hours: 48.

Frequency of Collection: On occasion.

There are no capital costs or operating and maintenance costs associated with this collection.

(Authority: 44 U.S.C. 3501 et seq.)

Dated: September 16, 2025.

Robert Sidman,

Deputy Secretary of the Commission.

One comment was received in response to that notice; the comment stated that the collection of information is necessary. AmeriCorps has decreased the estimated number of respondents, resulting in a decrease in the estimated annual burden hours.

This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.
