Proposed Project

Performance Monitoring of CDC’s Comprehensive Suicide Prevention Program (OMB Control No. 0920-1368, Exp. 9/30/2025)—Revision—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This is a Revision request for the currently approved Performance Monitoring of CDC’s Comprehensive Suicide Prevention Program OMB Control No. 0920-1368, Exp. 9/30/2025). The Centers for Disease Control

and Prevention (CDC) seeks OMB approval for an additional three years to continue the collection of information from recipients funded under the Comprehensive Suicide Prevention Program cooperative agreement (CE22-2204), hereafter known as CSP. This Revision includes the addition of a new instrument to monitor syndromic surveillance data on a quarterly schedule. This enables CSP recipients to provide quarterly updates to partners in their individual jurisdictions, describing trends in syndromic surveillance data, including upticks or changes in patterns or groups impacted to promote tailored suicide prevention outreach. Quarterly reporting ensures CDC is apprised of trends in suicide related emergency department data within jurisdictions.

Recipients will continue to report progress and activity information to CDC on an annual schedule using a web-based Partners’ Portal. The Partners’ Portal allows recipients to fulfill their annual reporting obligations efficiently by employing user-friendly, easily accessible web-based instruments to collect necessary information for both progress reports and continuation applications including work plans. This approach enables recipients to save pertinent information from one reporting period to the next and reduces the administrative burden on the annual

continuation application and the performance monitoring process. Awardee program staff can review the completeness of data needed to generate required reports, enter basic summary data for reports annually, and finalize and save required reports for upload into other reporting systems, as required.

The information collection provides crucial data for program performance monitoring and allows NCIPC to respond to frequent inquiries about suicide prevention work from the Department of Health and Human Services, the White House, Congress and other interest-holders, as well as work towards our vision of “No lives lost to suicide” and our mission to use data, science, and partnerships to identify and implement effective suicide prevention strategies to foster healthy and resilient communities across the United States, per our suicide prevention strategic plan. Information to be collected will also strengthen CDC’s ability to monitor awardee progress, identify trends, provide data-driven technical assistance, and disseminate the most current surveillance data on suicide and suicide attempts.

CDC requests OMB approval for an estimated 480 annual burden hours. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
CSP Program recipients	Annual Progress Report	24	1	12
CSP Program Recipients	Syndromic Surveillance Report	24	4	2
