SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Safety Standard for Cigarette Lighters.

OMB Number: 3041-0116.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of cigarette lighters.

General Description of Collection: The Safety Standard for Cigarette Lighters (16 CFR part 1210) addresses the risks of death and burn injury associated with fires accidentally started by children playing with cigarette lighters. The standard requires certain test protocols, as well as recordkeeping and reporting requirements. 16 CFR part 1210, subpart B. In addition, section 14(a) of the Consumer Product Safety Act (CPSA) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard to issue a certificate stating that the product complies with all applicable consumer product safety standards. 15 U.S.C. 2063(a). Section 14(a) of the CPSA also requires that the certificate of compliance must be based on a test of each product or upon a reasonable testing program. *Id.*

Estimated Number of Respondents: Based on averaging available data from fiscal years 2021 (used in last PRA renewal) and 2024, CPSC estimates approximately 30 firms will respond to the collection annually.

Estimated Time per Response: The burden associated with the standard includes the time spent compiling the test records, either by the firm or by outside contractors. If the firm elects to use an outside contractor, no burden is incurred by the respondent. If tests are conducted in-house, the burden associated with compiling a test record for a new model is expected to be about 90 hours per model. There is no burden associated with the comparison lighters.¹ For recordkeeping, the time for a new model is estimated to be 20 hours and for a comparison lighter it is estimated to be 3 hours. For reporting,

¹ Under § 1210.14, if a manufacturer has tested one lighter model, and then wishes to distribute another lighter model that differs from the first model only in features that would not have an adverse effect on child resistance, the second model need not be tested in accordance with § 1210.4.
