

Estimated Number of Respondents: Based on a review of past inspections and published industry information, CPSC staff estimates that there could be as many as 615 domestic children's apparel manufacturers in the United States subject to the rule. However, not all these manufacturers will produce children's sleepwear. Therefore, this figure is likely an overestimate of the actual number of firms responding to the collection of information in any given year.

Furthermore, using the Harmonized Tariff System (HTS) codes for children's sleepwear, CPSC staff found approximately 3,641 importers that supply children's sleepwear to the U.S. market. Many of the 615 domestic manufacturers, along with many large U.S. retailers, may be among the importers, so this too could be an overestimate of respondents to the information collection. If all 615 U.S. producers and all 3,641 importers introduced new children's sleepwear garments each year, the total number of respondents to the information collection would be 4,256 (615 + 3,641). As noted above, the actual number of respondents is likely lower.

Estimated Time per Response: PRA burden associated with testing and recordkeeping of each sleepwear item is approximately three hours.

Total Estimated Annual Burden: The 50 largest domestic manufacturers and the 100 largest importers may each introduce an average of 100 new children's sleepwear items annually. The annual burden for the 50 large domestic manufacturers and the 100 largest importers is estimated at 45,000 hours for PRA burden associated with testing and recordkeeping (150 firms × 100 items × 3 hours). Without adjusting for possible double-counting, CPSC staff estimates that the remaining 565 manufacturers and 3,541 importers may each introduce an average of 10 new children's sleepwear items, for a total burden of 123,180 hours (4,106 × 10 items × 3 hours.) Therefore, the total estimated potential annual burden imposed by the standard and regulations on all manufacturers and importers of children's sleepwear will be about 168,180 hours (45,000 + 123,180).

Total Estimated Annual Cost to Respondents: Using compensation data available from the U.S. Bureau of Labor Statistics, "Employer Costs for Employee Compensation," December 2024, Table 4, total compensation for management, professional, and related workers in goods-producing private industries, <http://www.bls.gov/ncs>, the annual cost to the industry is estimated

to be \$12,748,044 based on an hourly wage of \$75.80 × 168,180 hours.
