As explained in this notice, the requirement to eFile most certificates does not begin until July 8, 2026.

Frequency of Response: On occasion.

Affected Public: Manufacturers, private labelers, and importers of children's products subject to a children's product safety rule.

General Description of Collection

Testing and Certification: On November 8, 2011, the Commission issued two rules for implementing third party testing and certification of children's products, as required by section 14 of the Consumer Product Safety Act (CPSA):

- *Testing and Labeling Pertaining to Product Certification* (76 FR 69482, codified at 16 CFR part 1107; the testing rule); and

- *Conditions and Requirements for Relying on Component Part Testing or Certification, or Another Party's Finished Product Testing or Certification to Meet Testing and Certification Requirements* (76 FR 69547, codified at 16 CFR part 1109; the component part rule).

The testing rule establishes requirements for manufacturers to conduct initial third party testing and certification of children's products, testing when there has been a material change in the product, continuing testing (periodic testing), and guarding against undue influence. A final rule on *Representative Samples for Periodic Testing of Children's Products* (77 FR 72205, Dec. 5, 2012) amended the testing rule to require that representative samples be selected for periodic testing of children's products.

The component part rule is a companion to the testing rule that is intended to reduce third party testing burdens, by providing all parties involved in the required testing and certifying of children's products the flexibility to conduct or rely upon testing where testing is the easiest and least expensive to accomplish. Certification of a children's product can be based upon one or more of the following: (a) component part testing; (b) component part certification; (c) another party's finished product testing; or (d) another party's finished product certification.

Section 1107.26 of the testing rule states the records required for testing and selecting representative samples. 16
