(viii) *Date Report Delivered to Congress: August 19, 2024*

\* As defined in Section 47(6) of the Arms Export Control Act.

#### **POLICY JUSTIFICATION**

##### *Australia—FGM–148F Javelin Missiles*

The Government of Australia has requested to buy three hundred fifty (350) Javelin FGM–148F missiles (includes four (4) fly-to-buy missiles). Also included is U.S. Government technical assistance; technical data; repair and return services; and other related elements of logistics and program support. The estimated cost is \$100 million.

This proposed sale will support the foreign policy and national security objectives of the United States. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will improve the Australian Army's capability to meet current and future threats by maintaining and increasing its anti-armor capability. Australia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be the Javelin Joint Venture between RTX Corporation, located in Tucson, AZ, and Lockheed Martin, located in Orlando, FL. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any U.S. Government or contractor representatives to Australia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24–66

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

#### (vii) *Sensitivity of Technology:*

1. The Javelin Weapon System is a medium-range, man portable, shoulder-launched, fire and forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft, and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. The Javelin's key technical feature is the use of fire-and-forget technology which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top-attack and direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor thus decreasing its detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, which are a reusable Light Weight Command Launch Unit (LWCLU) and a round contained in a disposable launch tube assembly. The LWCLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The LWCLU may also be used in a stand-alone mode for battlefield surveillance and target detection. The LWCLU's thermal sight is a 3rd generation Forward Looking Infrared (FLIR) sensor. To facilitate initial loading and subsequent updating of software, all on-board missile software is uploaded via the LWCLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in

either the top-attack or direct fire modes (for target undercover). An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Australia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Australia.

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 24-0E. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 08-83 of September 26, 2008.

Sincerely,

Michael F. Miller  
Acting Director

Enclosure:

1. Transmittal

Transmittal No. 24-0E

*Report of Enhancement or Upgrade of Sensitivity of Technology or Capability (Sec. 36(B)(5)(C), AECA)*

(i) *Purchaser:* Government of Israel  
(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 08-83

Date: September 26, 2008  
Implementing Agency: Air Force  
Funding Source: Foreign Military Financing

(iii) *Description:* On September 26, 2008, Congress was notified by congressional certification transmittal number 08-83 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of an initial 25 F-35 Joint Strike Fighter Conventional Take-Off and Landing (CTOL) aircraft with an option to purchase at a later date an additional 50 F-35 CTOL or Short Take-Off and Vertical Landing (STOVL) aircraft. All aircraft would be configured with either the Pratt and Whitney F-135 engines or General Electric-Rolls Royce F-136 engines. Other Aircraft Equipment included: Electronic Warfare Systems; Command, Control, Communication, Computers and Intelligence/Communication,

Navigational and Identification (C4I/CNI); Autonomic Logistics Global Support System (ALGS); Autonomic Logistics Information System (ALIS); Flight Mission Trainer; Weapons Employment Capability, and other Subsystems, Features, and Capabilities; F-35 unique infrared flares; unique systems or sovereign requirements; reprogramming center, Hardware/Software In-the-Loop Laboratory Capability; External Fuel Tanks; and F-35 Performance Based Logistics. Also included: software development/integration, flight test instrumentation, aircraft ferry and tanker support, support equipment, tools and test equipment, spares and repair parts, personnel training and training equipment, publications and technical documents, U.S. Government and contractor engineering and logistics personnel services, and other related elements of logistics and program support. Non-MDE included: software development/integration, flight test instrumentation, aircraft ferry and tanker support, support equipment, tools and test equipment, spares and repair parts, personnel training and

training equipment, publications and technical documents, U.S. Government and contractor engineering and logistics personnel services, and other related elements of logistics and program support. The estimated total cost was \$15.2 billion. Major Defense Equipment (MDE) constituted \$8.3 billion of this total.

This transmittal notifies the inclusion of the following additional MDE items: seven (7) Pratt and Whitney F-135 engines (spares). This transmittal clarifies that the original notification of up to seventy-five (75) F-35s included the sale of up to seventy-five (75) Pratt and Whitney F-135 or General Electric-Rolls Royce F-136 engines. The total value of the additional MDE is \$96.6 million; the total MDE value will remain \$8.3 billion. Non-MDE value will remain at \$6.9 billion. The estimated total cost will remain at \$15.2 billion.

(iv) *Significance:* This notification is being provided as the additional MDE items were not enumerated in the original notification. The proposed sale of this equipment will provide Israel sufficient spare engines to support the overall F-35 spares concept.

(v) *Justification*: The United States is committed to the security of Israel, and it is vital to U.S. national interests to assist Israel to develop and maintain a strong and ready self-defense capability. This proposed sale is consistent with those objectives.

(vi) *Sensitivity of Technology*: The Sensitivity of Technology Statement contained in the original notification applies to items reported here.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) *Date Report Delivered to Congress*: August 1, 2024
