BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–104199; File No. SR–MRX–2025–27]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Remove the Exchange's Dedicated GPS Antenna Service Under General 8, Section 1(d)

November 18, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on September 30, 2025, Nasdaq MRX, LLC (“MRX” or “Exchange”), filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to remove the Exchange's dedicated GPS antenna service under General 8, Section 1(d) (Co-Location Services), as discussed further below.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rulefilings>, and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The

Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange offers a Global Positioning System (“GPS”) antenna, which allows customers that co-locate their servers and equipment within the Exchange's data center (“NY 11”) in Carteret, NJ to synchronize their time recording systems to the U.S. Government's GPS network time (the “Service”). GPS network time is the atomic time scale implemented by the atomic clocks in the GPS ground control stations and GPS satellites. Each GPS satellite contains multiple atomic clocks that contribute precise time data to the GPS signals. GPS receivers decode these signals, synchronizing the receivers to the atomic clocks. A GPS antenna serves as a time signal receiver and feeds a primary clock device the GPS network time using precise time data. Firms can use the precise time data provided by the GPS antenna to time-stamp transactional information. Time synchronization services are well established in the U.S. and utilized in many areas of the U.S. economy and infrastructure. The Service is not novel to the securities markets, or to the Exchange.

Historically, the Exchange has offered connectivity to a GPS antenna via two options—over shared infrastructure or a dedicated antenna. The shared infrastructure provides GPS services through Nasdaq installed shared cables and hardware located within the data center, whereas the dedicated antenna requires the firm to supply their own privately owned antenna hardware. The installation fee for the shared connection is \$900, and the monthly fee is \$600. The installation fee for the dedicated connection is \$1,500 and the monthly fee is \$600. Firms may choose to purchase multiple time synchronization services for resiliency or otherwise.³ The Exchange offers the Service as a convenience to firms to provide them with the ability to synchronize their own primary clock devices to GPS time via a shared GPS timing signal and time-stamp

transactional information.⁴ Firms do not receive an advantage by purchasing the Service from Nasdaq.

The Exchange proposes to remove the dedicated GPS antenna service from its co-location service offering. The decision to remove the dedicated GPS service option is consistent with the Exchange's project to equalize certain connections across its entire data center campus, including both its existing NY11 facility and the NY11–4 expansion (the “Equalization Project”) and maintain adequate controls of all cables that run throughout the data center.⁵ The Exchange has identified a risk where customers with a dedicated GPS antenna, which is located on the roof of the data center, may be able to circumvent the equalized infrastructure. In accordance with the Equalization Project's goal of ensuring that customers do not bypass the integrity of the equalized connections maintained throughout the data center, the Exchange is no longer allowing customers to order dedicated GPS antenna service as of September 30, 2025. Service for existing customers with a dedicated GPS antenna will terminate as of April 1, 2026, and all dedicated GPS antennas must be removed by such date. Customers that want to continue to utilize the Service can request the shared GPS antenna.

Currently, approximately 49% of the Exchange's co-location customers subscribe to the Service, most of which opt for the shared option. The Service is an optional product available to any firm that chooses to subscribe. Firms may cancel their subscription at any time. The Service simply provides time synchronization that may be utilized by firms to adjust their own time systems and time-stamp transactional information. The GPS antenna is offered on a completely voluntary basis. No customer is required to purchase the GPS antenna. Potential subscribers may subscribe to the Service only if they voluntarily choose to do so. It is a business decision of each firm whether to subscribe to the Service or not. Customers do not receive an advantage by purchasing the Service from Nasdaq; the Exchange is merely providing access to GPS signals.

⁴ In offering the Service as a convenience to firms, the Exchange incurs certain costs, including costs related to the data center facility, hardware and equipment, and personnel.

⁵ See Securities and Exchange Act Release No. 34–101078 (Sept. 18, 2024), 89 FR 77937 (September 24, 2024) (SR–NASDAQ–2024–054) (“Co-Location Expansion Proposal”).

¹⁰ 17 CFR 200.30–3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ Of the Exchange's co-location customers that subscribe to the Service, approximately 5% of such co-location customers purchase both the dedicated and the shared options of the Service.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁶ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,⁷ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange's proposed change to its connectivity service offering is reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'"⁸

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."⁹

The Exchange believes that it is reasonable and equitable to remove the dedicated GPS antenna service and fee from its connectivity offerings because the service does not align with the

Exchange's Equalization Project and the goal of maintaining the integrity of equalization within the Exchange's data center. The removal of the dedicated antenna is unlikely to burden the market because the purchase of the Service is optional for all categories of co-location customers and customers can discontinue the use of the Service at any time. Additionally, customers will maintain the option of utilizing the Service via the shared GPS antenna. Additionally, the proposed change is not unfairly discriminatory because the dedicated GPS service will be removed for all market participants and the option to utilize the shared Service will also be available for all market participants. As discussed above, approximately 49% of the Exchange's co-location customers subscribe to the Service and most of them opt for the shared antenna.

The Exchange believes that it is reasonable to provide existing customers with at least six months lead time to prepare to remove their dedicated antenna from the data center's roof before the service terminates. This provides co-location customers with sufficient time to remove their antennas from the data center and switch to the shared GPS antenna service before the direct GPS antenna service is terminated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Nothing in the proposal imposes any burden on the ability of customers or other exchanges to compete. The Exchange operates in a highly competitive market in which exchanges and other vendors offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Eliminating the dedicated GPS antenna services will not cause any burden on inter-market competition. Additionally, there is no burden to intra-market competition because the direct GPS antenna service is being terminated for all customers and the Exchange has provided all customers with the same timeline to terminate or convert to the shared GPS antenna service on a non-discriminatory basis. Use of any co-location service is completely voluntary, and each market participant can determine whether to use co-location services based on the requirements of its business operations.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.¹⁰

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-MRX-2025-27 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-MRX-2025-27. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-104194; File No. SR-IEX-2025-28]

Self-Regulatory Organizations; Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Rule 11.180, Units of Trading, To Conform to Rule 600 of Regulation NMS

November 18, 2025.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the "Act")² and Rule 19b-4 thereunder,³ notice is hereby given that, on September 30, 2025, the Investors Exchange LLC ("IEX" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Act,⁴ and Rule 19b-4 thereunder,⁵ the Exchange is filing with the Commission a proposed rule change to amend IEX Rule 11.180, Units of Trading, to conform with a recent amendment to the definition of "round lot" under Rule 600 of Regulation NMS recently approved by the Commission.⁶ The Exchange has designated this proposal as non-controversial and provided the Commission with the

notice required by Rule 19b-4(f)(6)(iii) under the Act.⁷

The text of the proposed rule change is available at the Exchange's website at <https://www.iexexchange.io/resources/regulation/rule-filings> and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend IEX Rule 11.180, Units of Trading, to conform with the definition of round lot under Rule 600 of the Regulation NMS that is to be implemented in November 2025.⁸

In 2020, the Commission adopted amendments to Regulation NMS to modernize the NMS information provided within the national market system for the benefit of market participants and to better achieve Section 11A's goals of assuring "the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities that is prompt, accurate, reliable, and fair" ("MDIR").⁹ These changes included an amendment to Rule 600 of Regulation NMS to include a definition of round lot that assigns each NMS stock to a round lot size based on the stock's average closing price. Prior to this change, a round lot was not defined in the Act or Regulation NMS. The definition of a round lot was included in the rules of each exchange, including IEX Rule 11.180, which typically defined a round lot as 100 shares, but also allowed the exchange, or the primary listing exchange for the

security, discretion to define it otherwise.¹⁰

In light of delays in the implementation of the MDIR, including the definition of round lot, on September 18, 2024, the Commission, among other things, accelerated the implementation of the round lot definition. The Commission also revised the round lot definition as set forth below.¹¹ Rule 600(b)(93) of Regulation NMS, as adopted by the MDIR and as amended in 2024,¹² defines a round lot for NMS stocks¹³ that have an average closing price on the primary listing exchange during the prior Evaluation Period¹⁴ of: (1) \$250.00 or less per share as 100 shares; (2) \$250.01 to \$1,000.00 per share as 40 shares; (3) \$1,000.01 to \$10,000.00 per share as 10 shares; and (4) \$10,000.01 or more per share as 1 share. For any security that becomes an NMS Stock during an operative period, as described in Rule 600(b)(93)(iv)¹⁵ a round lot is 100 shares. Adjustments to the round lot size for a security will occur on a semiannual basis and the calculation of the average closing price on the primary listing exchange will be based on a one month "Evaluation Period."

The revised definition of round lot is to be implemented on November 3, 2025, the first business day of November 2025.¹⁶ The Exchange now proposes to amend IEX Rule 11.180, Units of Trading, to conform with the definition of round lot in Rule 600 of Regulation NMS.

IEX Rule 11.180(a) currently reads as follows:

One hundred (100) shares shall constitute a "round lot" or "normal unit of trade," any amount less than 100 shares shall constitute

¹⁰ As noted in current IEX Rule 11.180, the Exchange then conforms its definition of a round lot to the direction of the primary listing market.

¹¹ See *supra* note 6.

¹² *Id.*

¹³ "NMS stock" is defined under Regulation NMS as any NMS security other than an option. 17 CFR 242.600(b)(65).

¹⁴ Rule 600(b)(93)(iii) of Regulation NMS defines the Evaluation Period as (A) all trading days in March for the round lot assigned on the first business day in May and (B) all trading days in September for the round lot assigned on the first business day of November during which the average closing price of an NMS stock on the primary listing exchange shall be measured by the primary listing exchange to determine the round lot for each NMS stock.

¹⁵ Pursuant to Rule 600(b)(93)(iv) of Regulation NMS the round lot assigned under this section shall be operative on: (A) The first business day of May for the March Evaluation Period and continue through the last business day of October of the calendar year; and (B) The first business day of November for the September Evaluation Period and continue through the last business day of April of the next calendar year.
