Second, the minimum flow requirement below Scott Dam, as measured by compliance gage E-2, would be modified to 20 cfs at all times, regardless of calendar date or water year classification. In addition, the definition of compliance with minimum flows would be established as the mean daily flow, defined as the ‘calculated 24-hour average of the flow’. Further, the block water allocation of 2,500 acre-feet reserved for the release at the discretion of resource agencies would be changed from each ‘water’ year to each ‘calendar’ year. The licensee is proposing this modified mode of operation until the Commission acts on the pending surrender application, filed with the Commission on July 25, 2025, or other Commission proceeding.
