filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. *Description of Request:* Due to drought conditions, the license proposes to temporarily amend the minimum flow requirements at the Comerford Development to preserve the depleted storage capacity of its upstream Moore reservoir, which may prevent future flow reductions if the drought worsens. With the proposed modifications to operations at the Comerford Development, the minimum flow would be decreased from 1,145 cubic feet per second (cfs) to 600 cfs, from September 29, 2025, to January 31, 2026. The licensee would increase flows from Comerford to 1,145 cfs prior to January 31, 2026, when sufficient precipitation refills Moore Reservoir to its median elevation of 805 feet mean sea level.
