

back to the use of a designated AJD form to facilitate efficient and consistent documentation of the basis of its AJDs, consistent with implementation under prior WOTUS regimes.

Because the Corps intends to utilize the new AJD form upon the effective date of the anticipated final WOTUS rule, the Corps is publishing this information collection notice to make the public aware of the proposed change to the approved information collection in accordance with the PRA. This proposed change to the Corps existing collection is independent of the agencies' ongoing rulemaking to revise the definition of WOTUS, and therefore comments on that rulemaking should not be submitted in response to this notice and instead should be submitted to the agencies' separate docket for that rulemaking action (WOTUS Docket ID No. EPA-HQ-OW-2025-0322). It should also be noted that while the agencies anticipate a reduction in the number of respondents who make use of the AJD forms in this collection due to less demand for AJDs and clearer regulatory language associated with the anticipated final WOTUS rule, the specific requirements of any new final rule defining WOTUS will not be known until such time as the final rule is published in the **Federal Register**. Therefore, the Corps is not able to provide a copy of its proposed AJD Form at this time for comment. However, the structure, function, and format of any new AJD Form would be similar to the most recent AJD Form that the Corps developed, Form ENG 6281 (2023 Rule—Approved Jurisdictional Determination (Interim)), which the Corps used to implement the "Revised Definition of 'Waters of the United States,'" 88 FR 3004 (January 18, 2023) ("2023 Rule"). The ENG 6281 is being included for historic purposes and as a basis for comment on this information collection request.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Provider Beliefs Regarding the Deadlift and their Effect on Patient Management; OMB Control Number 0720–PBRD.

Type of Request: New.

Number of Respondents: 875.

Responses per Respondent: 1.

Annual Responses: 875.

Average Burden per Response: 10 minutes.

Annual Burden Hours: 146.

Needs and Uses: The United States Army implemented the Army Combat Fitness Test (ACFT) as the fitness test of record in October 2020. The ACFT contains six events, including the maximum deadlift (MDL), which is a three-repetition maximum lift using a hex (or trap) style bar. Currently, there is a paucity of literature regarding healthcare provider beliefs and the deadlift exercise. Despite limited evidence of positive association for lumbopelvic injuries and deadlift, there are concerns about the deadlift being a part of the ACFT. Given the mandatory nature of the MDL as part of the Army’s annual fitness requirement, it is imperative to understand the beliefs providers possess as patients are likely to seek them out following an episode of low back pain. Their beliefs may significantly influence treatment behaviors which could positively or negatively affect patient outcomes which may affect days on limited duty, deploy ability statistics, and/or return to duty rates, all of which directly influence military readiness. The primary aim of the survey is to assess if provider beliefs regarding the deadlift exercise differ among various healthcare provider disciplines within the military healthcare system and assess if these differences are consistent with validated treatment orientations for lower back pain, and if differences in beliefs influence treatment behaviors for a patient presenting with a deadlift injury.

Affected Public: Individuals or households.

Frequency: As required.

Respondent’s Obligation: Voluntary.

DOD Clearance Officer: Mr. Reginald Lucas.
