SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The Construction Fall Protection Systems Criteria, Practices, and Training Requirements Standard requires employers to certify safety nets and develop fall protection plans, respectively, and prepare worker training certification records. These standards ensure that employers provide the required fall protection for their workers and provide the required training.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements,

including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Construction Fall Protection Systems Criteria, Practices, and Training Requirements Standard. The agency is requesting an adjustment increase in burden going from 506,903 to 560,607 hours, a total increase of 53,704 hours. The adjustment increase is primarily the result of an increase in the number of affected establishments going from 406,714 to 449,782 establishments. Also, the total number of responses increased going from 6,072,808 to 6,715,846.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Construction Fall Protection Systems Criteria, Practices (29 CFR 1926.502), and Training Requirements (29 CFR 1926.503) Standard.

OMB Control Number: 1218–0197.

Affected Public: Business or other for-profits.

Number of Respondents: 449,782.

Number of Responses: 6,715,846.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours:

560,607.

Estimated Cost (Operation and Maintenance): \$0.
