II. Discussion

The NRC is issuing for public comment draft Supplement 13, Second Renewal to the GEIS for License Renewal of Nuclear Plants, NUREG–1437. This document includes the NRC staff's preliminary analysis of the environmental impacts of the proposed action of RNP SLR and the alternative to the proposed action. The NRC staff's preliminary recommendation is that the adverse environmental impacts of RNP SLR are not so great that preserving the option of SLR for energy-planning decisionmakers would be unreasonable and that the environmentally preferred alternative is the proposed action.

Dated: January 5, 2026.
