

Segment Enhancement launcher conversion kit; generators; generator spare parts; prime movers; spare parts for prime movers; KG-250X encryptor; AN/TPX-57v1 identification friend or foe (IFF); KIV-77 encryptor; personnel communication equipment training; Defense Advanced Global Positioning Systems Receivers (DAGRs); U.S. Government and contractor representative technical assistance; engineering and logistics support services; publications and technical documentation; classified software; classified books and publications; and other related elements of logistics and program support. The estimated total cost is \$280 million.

This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a NATO Ally that is an important force for political and economic stability in Europe.

The proposed sale will improve Romania's capability to meet current and future threats by enabling it to field a credible force to deter adversaries and support its participation in NATO operations. Romania will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be RTX Corporation, located in Andover, MA, and Lockheed Martin, located in Bethesda, MD. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require approximately five U.S. Government and five U.S. contractor representatives to travel to Romania for a duration of up to three years to support equipment fielding and training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25-19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AN/MPQ-65 Configuration 3+ Increment 3 PATRIOT radar set (RS) consists of a multifunction phased-array radar mounted on a semitrailer. The RS is powered by the Electric Power Plant (EPP) and monitored and controlled by

the Engagement Control Station (ECS). The AN/MPQ-65 RS provides airspace surveillance, detection, target tracking, identification, missile tracking, missile guidance, and electronic counter-countermeasures. It has the capability to track a wide variety of targets under saturation raid conditions and support the simultaneous operation of multiple PATRIOT missiles to defend against a threat.

2. The AN/MSQ-132 Configuration 3+ Increment 3 ECS provides operational control of the PATRIOT Fire Unit (FU). The ECS exchanges FU initialization data, defense readiness conditions, states of alert, target evaluation data, engagement-related data, and ECS status with the Information and Coordination Central.

3. The M903 LS is a mobile tactical unit that transports, aims, and launches the PATRIOT Guidance Enhanced Missile (GEM-T) and PATRIOT Advanced Capability-3 (PAC-3) missiles. The LS is controlled from the Engagement Control Station (ECS) via the Data Link Terminal network.

4. The Power Generation Equipment Electric Power Plant (EPP) III provides tactical power for the ECS and RS. The EPP consists of two 15-kilowatt generator sets which are interconnected through the power distribution unit.

5. The KG-250X encryptor is a rugged, flexible, low-size, weight, and power (SWAP), high-speed inline network encryptor. It is used to secure sensitive data on military and government networks by encrypting network traffic, allowing for secure communication in high-risk environments.

6. The identification friend or foe (IFF) is an identification system designed for command and control. It enables military and civilian air traffic control interrogation systems to identify aircraft, vehicles, or forces as friendly, and to determine its bearing and range from the interrogator. The AN/TPX-57(V1) with KIV-77 encryptor is an Air Defense Interrogator (ADI) that is used to classify and re-classify targets in IFF systems.

7. The Defense Advanced Global Positioning System (GPS) Receiver (DAGR) is a small, commercial, NAVSTAR GPS receiver designed for military operations. The Selective Availability Anti-Spoofing Module (SAASM) is a security device controlling the encryption that enables Precise Positioning Service (PPS) Y-code signals from GPS satellites and resists adversary attempts to spoof GPS signals. The DAGR with SAASM will provide position and location information necessary for ground-based

operation. The DAGR has a graphical screen, 12-channel continuous satellite tracking, simultaneous L1/L2 dual frequency GPS signal reception, and extended performance in a diverse jamming environment.

8. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

9. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

10. A determination has been made that Romania can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

11. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Romania.

(viii) *Date Report Delivered to Congress:* April 30, 2025

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

India—Indo-Pacific Maritime Domain Awareness

The Government of India has requested to buy SeaVision software (including requested software enhancements); Technical Assistance Field Team (TAFT) training; remote software and analytic support; access to SeaVision documentation; and other related elements of logistics and

program support. The estimated total cost is \$131 million.

This proposed sale will support the foreign policy and national security objectives of the U.S. by helping to strengthen the U.S.-Indian strategic relationship and to improve the security of a major defense partner which continues to be an important force for political stability, peace, and economic progress in the Indo-Pacific and South Asia regions.

The proposed sale will improve India's capability to meet current and future threats by bolstering its maritime domain awareness, analytical capabilities, and strategic posture. India will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Hawkeye 360, located in Herndon, VA. At this time, the U.S. Government is not aware of any offset agreement proposed

in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to India.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25–22

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. SeaVision is a web-based maritime situational awareness tool that enables users to view and share a broad array of maritime information to improve maritime operations, increase maritime security, and build partnerships within the maritime community. As part of its alignment with the Indo-Pacific Maritime Domain Awareness (IPMDA) initiative, SeaVision provides access to available commercial data sources, including commercial radio frequency (RF), Automatic Identification System (AIS), imagery, and ship registry data. This sale also offers Technical

Assistance Field Team (TAFT) training, remote software and analytic support, and comprehensive SeaVision documentation to further enhance maritime domain awareness and cooperation.

2. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that India can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of India.
