SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for renewal of an approved information collection. The National Marine Fisheries Service (NMFS), Alaska Regional Office (AKR), is the sponsor of this information collection.

The North Pacific Fishery Management Council (Council) has developed cooperative programs as options in several fishery catch share programs. As part of cooperative

programs, the Council and the National Marine Fisheries Service (NMFS) have required or requested that the cooperatives submit annual reports detailing various fishery activities. These reports are intended to be a resource for the Council to track the effectiveness of cooperatives and their ability to meet the Council's goals, and as way for NMFS to monitor the internal fishery management practices of cooperatives. Additionally, they are a tool for the cooperatives to provide feedback on the programs. This collection covers the following required and voluntary cooperative and inter-cooperative reports, agreements, and plans:

- The Alaska Crab Rationalization Program Cooperative Annual Report is voluntary and provides information about measures taken by cooperatives to increase the availability of crab quota share (QS) for transfer to active participants and crew members in the fishery, as well as actions to decrease high QS lease rates and improve low crew compensation.

- The Rockfish Program Cooperative Annual Report is a voluntary summary of cooperative harvests, retention, discards, monitoring methods, and disciplinary actions made within each Rockfish Program cooperative. Additionally, it contains voluntary reporting requirements including monthly chinook bycatch by origin, and intertemporal harvest information.

- The Amendment 80 Cooperative Annual Report is a required summary of cooperative harvests, discards, monitoring methods, disciplinary actions taken against non-compliant members, groundfish retention calculations, and a third-party audit. Voluntary elements of the report include catch from the Northern Bristol Bay Trawl Area, fleet catch capacity over time, and intertemporal harvest information. An additional voluntary element was added to this report in 2019 requesting information on cooperatives or other measures implemented to reduced bycatch in the BSAI yellowfin sole Trawl Limited Access Sector fishery by A80 participants.

- The Amendment 80 Halibut Prohibited Species Catch (PSC) Management Plan is a voluntary collection providing information to the Council about fishery cooperative halibut avoidance practices, communication between participating harvesters, use of halibut excluders, deck sorting, bycatch performance assessment of individual boats, incentives to reduce bycatch, and

consequences for substandard performance.

- The American Fisheries Act Catcher Vessel Intercooperative Agreement is voluntary and includes fishery allocations of cooperative members, penalties to members that exceed them, monitoring methods, limits on the amount of cod harvested by certain vessels. Procedures for Intercooperative sideboard transfers and incentives for prohibited species catch reduction.

- The American Fisheries Act Cooperative Annual Report is required and must report the cooperative's pollock and sideboard allocations, sub-allocations made to individual vessels, retained and discarded catch, monitoring methods, actions taken against non-compliant members, any pollock landed outside the State of Alaska, and chinook bycatch including a list of vessels with the highest bycatch rates. An additional voluntary element was added to this report in 2019 requesting information on cooperatives or other measures implemented to reduce bycatch in the BSAI yellowfin sole Trawl Limited Access Sector fishery by AFA participants.

- The Pacific Cod Trawl Cooperative (PCTC) Annual Report is voluntary and provides information on the structure, function and operation of the cooperatives, including information on cooperative quota (CQ) leasing activities, and any penalties issued, harvest of CQ resulting from processor-held quota share (QS), cooperative membership, cooperative management, and performance (including implementation of the Aleutian Islands set-aside when in effect).
