Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

#### Abstract of Proposed Collection

This information collection is used for two main purposes: (1) the collection and submission of information required for DDTC approval of a reexport or retransfer; and (2) the collection and retention of certain information for authorizations and other approvals, including for reexports and retransfers under an Open General License (OGL) program. Under § 123.9(a) of the ITAR, unless an exemption applies, DDTC's written approval must be obtained before reselling, transferring, reexporting, retransferring, transshipping, or disposing of a defense article to any end-user, end-use, or

destination other than as stated on the export license or in the Electronic Export Information filing in cases where an exemption was claimed. Such approval is normally granted through case-by-case review of requests to authorize specific transfers. In addition, ITAR § 120.22(b) allows DDTC to provide export authorization for DDTC's own initiatives, including pilot programs and other specifically anticipated circumstances for which DDTC considers special authorizations appropriate. DDTC has launched a pilot program pursuant to its authorities in ITAR § 120.22(b) in order to assess the concept of an OGL mechanism by which it may authorize certain transfers of defense articles to predetermined parties. OGLs eliminate the need for the Department to individually review and approve certain lower-risk transactions involving certain recipients. DDTC believes the OGL program will provide unprecedented flexibility for the U.S. defense industry and U.S. allies to operate consistent with the ITAR and will enhance their ability to maintain, repair, and store defense articles.

Under ITAR § 123.1(c), DDTC may require pertinent documentation regarding the proposed transaction and proper completion of the application form, including information about the quantity and value of the defense article proposed for export and information on the proposed end-user, end-use, and ultimate destination. Under ITAR § 123.9(c), persons who seek approval from DDTC to reexport or retransfer defense articles are required to submit a description, quantity, and value of the defense article and a description and identification of the new end-user, end-use, and destination. Under ITAR § 120.15(e) any person engaging in any reexport or retransfer of a defense article pursuant to an exemption must maintain records of each such transfer including the following information: A description of the defense article, including technical data, or defense service; the name and address of the end-user and other available contact information (e.g., telephone number and email address); the name of the natural person responsible for the transaction; the stated end-use of the defense article or defense service; the date of the transaction; and the method of transmission.

DDTC seeks to ensure that persons who rely on any current or future OGLs to conduct reexports and retransfers abroad retain the same records as would be required if their transactions were authorized by either a specific license or an exemption. Accordingly, DDTC has restated the record-keeping

requirements articulated in ITAR § 120.15(e) in the OGLs themselves.

### Methodology

Respondents will submit information as attachments to relevant license applications or requests for other approval. Applicants are referred to ITAR § 123.9 for guidance on what information to submit regarding the request to change end-user, end-use and/or destination of hardware. This information may be submitted electronically via a DS-6004, Reexport/Retransfer Application, through DDTC's case management system, the Defense Export Control and Compliance System (DECCS).

Separately, as described in ITAR § 120.15(e) and under the OGL pilot program and as described in each OGL, respondents will be required to retain certain information in their own records for a period of five years from the date of the reexport or retransfer.

*Authority:* 44 U.S.C. 3507.

### Abstract of Proposed Collection

The export, temporary import, and brokering of defense articles, defense services, and related technical data are licensed by the Directorate of Defense Trade Controls (DDTC) in accordance with the International Traffic in Arms Regulations ("ITAR," 22 CFR parts 120-130) and Section 38 of the Arms Export Control Act ("AECA").

ITAR § 126.18 eliminates, subject to certain conditions, the requirement for an approval by DDTC of the transfer of unclassified defense articles, which includes technical data, to or within a foreign business entity, foreign governmental entity, or international organization that is an authorized end-user or consignee (including transfers to approved sub-licensees) for defense articles, including the transfer to dual nationals or third-country nationals who are bona fide regular employees directly employed by the foreign consignee or end-user.

To use ITAR § 126.18, effective procedures must be in place to prevent diversion to any destination, entity, or for purposes other than those authorized by the applicable export license or other authorization. Those conditions can be met by requiring a security clearance approved by the host nation government for its employees, or by the end-user or consignee having in place a process to screen all its employees and to have executed a Non-Disclosure Agreement that provides assurances that the employee will not transfer any defense articles to persons or entities unless specifically authorized by the consignee or end-user. ITAR § 126.18(c)(2) also provides that the technology security/clearance plans and screening records shall be made available to DDTC or its agents for civil and criminal law enforcement purposes upon request.

### Methodology

When information kept on file pursuant to this recordkeeping requirement is required to be sent to the Directorate of Defense Trade Controls, it may be sent electronically or by mail according to guidance given by DDTC.
