Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,¹ within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Pre-Filing Waiver

Section 157.21 of the Commission's regulations requires pre-filing procedures for applications requesting to site, construct, and operate LNG terminal facilities. When requested by a potential applicant, the Commission has waived the mandatory pre-filing procedures if the proposal does not involve significant state and local safety considerations that have not been previously addressed. CP2 LNG did not request waiver of the pre-filing procedures. Nevertheless, we are waiving the mandatory pre-filing as part of this notice to be in accordance with 18 CFR 157.21(e)(2) because the application contains sufficient information required by 18 CFR 157.21(e)(2) to determine that this modification is not subject to the mandatory pre-filing procedures and review process. Applicants are reminded that for any future applications they must first obtain a waiver of the mandatory pre-filing procedures prior to filing an application with the Commission. Failure to do so may result in the rejection of an application.
