

technical, and logistical support services; and other related elements of logistics and program support. The estimated total cost is \$567.8 million.

This proposed sale will support the foreign policy and national security objectives of the U.S. by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Belgium's capability to meet current and future threats by providing air-to-air missiles and guidance units for Belgium's F-35 fleet in support of NATO's defense mission. Belgium will have no difficulty absorbing these weapons into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of the proposed sale will require the assignment of four U.S. Government and two contractor representatives to Belgium on a temporary basis in conjunction with program technical oversight and support requirements.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25–66

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM–9X Sidewinder Block II and Block II+ missile represents a substantial increase in missile acquisition and kinematics performance over the AIM–9M and replaces the AIM–9X Block I missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe, and the ability to integrate the helmet mounted cueing system. The software algorithms are the most sensitive portion of the AIM–9X missile. The software continues to be modified via a pre-planned product improvement (P³I) program to improve its counter-countermeasure capabilities. The most current AIM–9X Block II/II+ operational flight software developed for all international partner countries, which is authorized by U.S. Government export policy, provides fifth-generation infrared missile capabilities such as Lock-on after launch, weapon data link, surface attack, and surface launch. No software source code or algorithms will be released.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Belgium can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security

objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Belgium.

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 25-62, concerning the Army's proposed Letter(s) of Offer and Acceptance to the Government of Poland for defense articles and services estimated to cost \$780 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

Michael F. Miller
Director

BILLING CODE 6001-FR-C

Transmittal No. 25-62

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Poland

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$720 million
Other	\$ 60 million

TOTAL \$780 million

Funding Source: National Funds

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

- Two thousand five hundred six (2,506) FGM-148F Javelin missiles
- Two hundred fifty-three (253) Javelin Lightweight Command Launch Units

Non-Major Defense Equipment:

The following non-MDE items will be included: missile simulation rounds; battery coolant units; tool kits; spares support; training;

United States (U.S.) Government and contractor technical assistance; transportation; and other related elements of logistics and program support.

(iv) *Military Department:* Army (PL-B-UFJ)

(v) *Prior Related Cases, if any:* PL-B-UDN

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* September 18, 2025

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Poland—Javelin Missile Systems

The Government of Poland has requested to buy two thousand five hundred six (2,506) FGM-148F Javelin missiles and two hundred fifty-three

(253) Javelin Lightweight Command Launch Units. The following non-MDE items will be included: missile simulation rounds; battery coolant units; tool kits; spares support; training; U.S. Government and contractor technical assistance; transportation; and other related elements of logistics and program support. The estimated total cost is \$780 million.

This proposed sale will support the foreign policy and national security of the U.S. by improving the security of a NATO Ally that is a force for political and economic stability in Europe.

The proposed sale will improve Poland's capability to meet current and future threats by upgrading its existing legacy Command Launch Units and increasing its defense inventory, thereby reinforcing its capability to protect Polish sovereign territory and improving its ability to meet NATO requirements. Poland will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be RTX Corporation, located in Arlington, VA; and Lockheed Martin, located in Tucson, AZ. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25–62

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Javelin is a medium-range, man-portable, shoulder-launched, fire-and-forget anti-tank system for infantry, scouts, and combat engineers. It can be mounted on a variety of platforms including vehicles, aircraft, and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology, which allows the gunner to fire and immediately relocate or take cover. Additional features are the top attack and direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered

fighting positions. The Javelin missile also has a minimum smoke motor thus decreasing the likelihood of detection on the battlefield.

3. The Javelin weapon system is comprised of two major tactical components, which are a reusable Lightweight Command Launch Unit (LwCLU) and a round contained in a disposable launch tube assembly. The LwCLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The LwCLU can also be used in a stand-alone mode for battlefield surveillance and target detection. The LwCLU's thermal sight is a second generation forward looking infrared sensor. To facilitate initial loading and subsequent updating of software, all on-board missile software is uploaded via the LwCLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in either the top attack or direct fire modes. An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that the Government of Poland can provide substantially the same degree of

protection for the sensitive technology being released as the U.S. government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed on this transmittal have been authorized for release and export to the Government of Poland.
