The latter category includes: items of the same kind as those on multilateral lists but falling below the control list parameters when it is determined that such items have the potential of making a material contribution to WMD or cruise or ballistic missile systems; items on U.S. national control lists for WMD/missile reasons that are not on multilateral lists; and other items with the potential of making such a material contribution when added through case-by-case decisions.

On January 22, 2026, the U.S. Government applied the measures authorized in Section 3 of the Iran, North Korea, and Syria Nonproliferation Act (Pub. L. 109-353) against the following foreign persons identified in the report submitted pursuant to Section 2(a) of the Act:

These measures shall be implemented by the responsible departments and agencies of the U.S. government and will remain in place for two years from the effective date, except to the extent that the Secretary of State may subsequently determine otherwise. [Docket No. **FAA-2025-5436**]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Reduction of Fuel Tank Flammability on Transport Category Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew a previously approved information collection. The current Fuel Tank Flammability Safety rule 25.981 requires the Design Approval Holder (DAH) to report to the FAA on the component reliability of the fuel tank flammability reduction means. DAH as specified in AC 25.981-2A is the holder of any design approval, including type certificate, amended type certificate, supplemental type certificate, amended supplemental type certificate, Parts Manufacturer Approval (PMA), Technical Standard Order (TSO) authorization, letter of TSO design approval, and field approvals. As the transport aircraft fleet continues to fly longer than expected and component reliability may be affected or degraded, the data collection is needed on an ongoing basis to ensure the aircraft fuel tank safety level continues to meet the predicted reliability at the time of certification. This collection of information supports the FAA's Safety Management System (SMS) safety goal and by proactively identifying hazards and mitigating risks before incidents occur.

DATES: Written comments should be submitted by March 30, 2026.
