

total case value increasing to \$1.475 billion.

On July 28, 2022, Congress was notified by congressional certification transmittal number 0M-22 of the inclusion of fifty-two (52) AN/ARC-231A (RT 1987) radios. The estimated value of the additional MDE items is \$15 million, but the addition did not result in a change to the notified MDE total of \$1.342 billion. The total case value remained \$1.475 billion.

This transmittal notifies the inclusion of the following MDE items: ten (10) OT-228/U, Common Infrared Countermeasure (CIRCM) systems. The following non-MDE items will be included: U.S. Government technical assistance; incidental travel; transportation; new equipment training; technical data; reports; compatibility testing; firing tables; ancillary items; and other related elements of logistics and program support. The estimated total cost of the new items is \$85 million. The estimated total cost of the new MDE items is \$65 million, resulting in a revised estimated MDE cost of \$1.407 billion. The revised estimated total case value is \$1.560 billion.

(iv) *Significance*: This notification is being provided as the MDE items were not enumerated in the original notification. The inclusion of this MDE represents an increase in capability over what was previously notified.

(v) *Justification*: This proposed sale will support the foreign policy and national security objectives of the U.S. by improving the security of a NATO Ally which is an important force for

political stability and economic progress in Europe.

(vi) *Sensitivity of Technology*:

Common Infrared Countermeasure (CIRCM) is the next-generation lightweight, laser-based, infrared countermeasure system for rotary-wing, tilt-rotor, and small fixed-wing aircraft across the DoD. CIRCM provides near spherical coverage of the host platform to defeat Infrared (IR)-seeking threat missiles. CIRCM receives an angular bearing hand-off from the Missile Warning System (CMWS or LIMWS), employs a pointing and tracking system that acquires and tracks the incoming missile. CIRCM jams the missile by using modulated laser energy, thus degrading the tracking capability of the missile and causing it to miss the aircraft. The highest level of information that may be transferred in support of this proposed sale is classified SECRET.

If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

A determination has been made that the Netherlands can provide substantially the same degree of protection of this technology as the U.S. Government. This proposed sale is necessary in furtherance of U.S. foreign policy and national security objectives outlined in the Policy Justification.

All defense articles, technical data, and services listed in this transmittal are

authorized for release and export to the Government of The Netherlands.

(vii) *Date Report Delivered to Congress*: October 1, 2025

February 28, 2025

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

On February 28, 2025, the Secretary of State, pursuant to section 36(b) of the Arms Export Control Act, as amended, determined that an emergency exists which requires the immediate sale of the defense articles and defense services identified in the attached transmittals to the Government of Israel through the Foreign Military Sales process, including any further amendment specific to costs, quantity, or requirements occurring within the duration of circumstances giving rise to this emergency sale.

Please find attached (Tab 1) the Secretary of State Determination and Justification waiving the congressional review requirements under Section 36(b)(1) and 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended for the attached lists of transmittals of proposed Letters of Offer and Acceptance to the Government of Israel. The determination and detailed justification are a part of each transmittal. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

Michael F. Miller
Director

DETERMINATION UNDER SECTION 36(b)(1) OF THE ARMS EXPORT
CONTROL ACT

Pursuant to section 36(b)(1) of the Arms Export Control Act, 22 U.S.C. 2776, I hereby determine that an emergency exists which requires the immediate sale through the following foreign military sales cases, including any further amendments specific to the cost, quantity, or requirements of these cases, in the national security interest of the United States:

For Israel:

- Bulldozers
- Administrative Price Change to Munitions
- 1,000-lb Warheads and JDAM Kits
- 2,000-lb Warheads

This determination shall be published in the *Federal Register* and, along with the accompanying Memorandum of Justification, shall be transmitted to Congress with the applicable notifications.

UNCLASSIFIED

(U) MEMORANDUM OF JUSTIFICATION
FOR EMERGENCY ARMS TRANSFERS TO ISRAEL UNDER SECTION 36(b)(1) OF
THE ARMS EXPORT CONTROL ACT

(U) On October 7, Hamas launched the worst attack on Israel since the 1973 Yom Kippur War, firing thousands of rockets, striking civilians and locations as far as Tel Aviv and Jerusalem. Hamas gunmen crossed into Israel, entering towns and communities as far as 15 miles from Gaza, slaughtering men, women, and children. More than 230 hostages were taken and dragged back into Gaza, including U.S. citizens. Hamas' act of terrorism has claimed the lives of nearly 1,200 in Israel, including at least 31 U.S. citizens, and wounded thousands more. The attack was the single deadliest day for the Jewish people since the Holocaust, and it was reminiscent of the worst rampages of ISIS. The following day, the Government of Israel formally declared war on Hamas in accordance with its Basic Law.

(U) Israel has the right to defend itself, and the United States strongly supports Israel taking necessary action to defend its country and protect its people from Hamas terrorists, consistent with international law, including the law of war. The Department of State and the Department of Defense are coordinating with Israeli partners to meet their military requirements and ensure Israel has what it needs to continue to defend itself, its people, and U.S. citizens living, working, and traveling in Israel.

(U) The United States' commitment to Israel's security is ironclad, which is reflected in decades of close political-military dialogues and high-level defense policy exchanges. The historic ten-year U.S.-Israel Memorandum of Understanding to provide Israel with \$38 billion in security assistance is a bulwark against regional threats. Should hostilities resume, Israel will need urgent and substantial support to respond to the immediate threat raised by Hamas' failure to uphold the terms of the ceasefire. Forced to respond to a resurgent Hamas, Israel must replenish stocks of key defense articles to fight and destroy Hamas, maintain its Qualitative Military Edge in the region, and continue to deter broader-scale regional conflict.

BILLING CODE 6001-FR-C

Transmittal No. 25-26

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Israel

(ii) *Total Estimated Value:*

Major Defense Equipment* ... \$557.5 million

Other \$118.2 million

TOTAL \$675.7 million

Funding Source: Foreign Military Financing

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

Two hundred one (201) MK 83 MOD 4/MOD 5 General Purpose 1,000-

pound bomb bodies
Four thousand seven hundred ninety-nine (4,799) BLU-110A/B General Purpose 1,000-pound bomb bodies
One thousand five hundred (1,500) KMU-559C/B Joint Direct Attack Munition (JDAM) guidance kits for the MK 83 bomb body
Three thousand five hundred (3,500) KMU-559J/B JDAM guidance kits for the MK 83 bomb body

Non-Major Defense Equipment:

The following non-MDE items will also be included: United States (U.S.) Government and contractor engineering, logistics, and technical support services; and other related elements of logistics and program support.

(iv) *Military Department:* Navy (IS-P-AVH), Air Force (IS-D-AFK)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to*

Congress: February 28, 2025

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION*Israel—Munitions, Guidance Kits, and Munitions Support*

The Government of Israel has requested to buy two hundred one (201) MK 83 MOD 4/MOD 5 General Purpose 1,000-pound bomb bodies; four thousand seven hundred ninety-nine (4,799) BLU-110A/B General Purpose 1,000-pound bomb bodies; one thousand five hundred (1,500) KMU-559C/B Joint Direct Attack Munition (JDAM) guidance kits for the MK 83 bomb body; three thousand five hundred (3,500) KMU-559J/B JDAM guidance kits for the MK 83 bomb body. The following non-MDE items will also be included: U.S. Government and contractor engineering, logistics, and technical support services; and other related elements of logistics and program support. The estimated total cost is \$675.7 million.

The Secretary of State has determined and provided detailed justification that an emergency exists that requires the immediate sale to the Government of Israel of the above defense articles (and defense services) in the national security interests of the U.S., thereby waiving the Congressional review requirements under Section 36(b) of the Arms Export Control Act, as amended.

The U.S. is committed to the security of Israel, and it is vital to U.S. national interests to assist Israel to develop and maintain a strong and ready self-defense capability. This proposed sale is consistent with those objectives.

The proposed sale improves Israel's capability to meet current and future threats, strengthen its homeland defense, and serves as a deterrent to regional threats. Israel already has these weapons in its inventory and will have

no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Repkon USA, located in Tampa, FL; and The Boeing Company, located in St. Charles, MO. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Israel.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 25-26

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The MK 83 MOD 4 and MK 83 MOD 5 are general purpose 1,000-pound bombs used by the United States Navy, Marine Corps, and Air Force, as well as foreign partners. The MK 83 series is used for unguided delivery in either low or high drag mode, or guided delivery when a guidance kit is attached. It is designed for soft, fragment-sensitive targets and is not intended for hard targets or penetrations.

2. The BLU-110 A/B is a general purpose 1,000-pound bomb used by the United States Navy, Marine Corps, and Air Force, as well as foreign partners. The BLU-110 series is a 1,000-pound warhead used for unguided delivery in either low or high drag mode, or guided delivery when a guidance kit is attached. It is designed for soft, fragment-sensitive targets and is not intended for hard targets or penetrations.

3. KMU-559 Joint Direct-Attack Munitions (JDAM) tail kits contain an Inertial Navigation System (INS)/Global Positioning System (GPS) (using either Selective Availability Anti-Spoofing Module (SAASM) or M-code) guidance capability that converts unguided free-fall bombs into accurate, adverse weather "smart" munitions. The KMU-559 tail kit is paired with a MK 83 class warhead to build a GBU-32 JDAM. The JDAM weapon can be delivered from modest standoff ranges at high or low altitudes against a variety of land and surface targets during the day or night. The JDAM can receive target

coordinates via preplanned mission data from the delivery aircraft, by onboard aircraft sensors (e.g., forward-looking infrared, radar, etc.) during captive carry, or from a third-party source via manual or automated aircrew cockpit entry.

4. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that Israel can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Israel.
