Abstract: Reclamation delivers Colorado River water to water users for diversion and beneficial consumptive use in the States of Arizona, California, and Nevada. The Consolidated Decree of the United States Supreme Court in the case of *Arizona v. California, et al.*, entered March 27, 2006 (547 U.S. 150

(2006)), requires the Secretary of the Interior to prepare and maintain complete, detailed, and accurate records of diversions of water, return flow, and consumptive use and make these records available at least annually. The information collected ensures that a State or water user within a State does not exceed its authorized use of Colorado River Water. Water users are obligated by provisions in their water delivery contracts to provide Reclamation information on diversions and return flows. Reclamation determines the consumptive use by subtracting return flow from diversions or by other engineering means.

SUPPLEMENTARY INFORMATION:

Scope.—For purposes of these investigations, Commerce has defined the subject merchandise as unwrought palladium, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot, powder, and similar forms. The scope does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping, or descaling.

Unwrought palladium is covered by the scope regardless of production method. The scope includes unwrought palladium produced through ore extraction, unwrought palladium produced by recycling palladium-containing scrap, unwrought palladium produced by any other method, and blends of unwrought palladium produced by different methods.

The scope includes unwrought palladium that is commingled with unwrought palladium from sources not subject to these investigations or commingled with other metals. Only the

subject unwrought palladium component of such commingled products is covered by the scope of these investigations.

Subject merchandise includes merchandise matching the above description that has been finished, packaged, or otherwise processed in a third country, including by refining, grinding, commingling, adding or removing additives, or performing any other finishing, packaging, or processing that would not otherwise remove the merchandise from the scope of the investigations if performed in the subject country.

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of an affirmative preliminary determination by Commerce that unwrought palladium is being sold in the United States at less than fair value within the meaning of § 733 of the Act (19 U.S.C. 1673b). Commerce's preliminary determination with respect to unwrought palladium alleged to be subsidized by the Government of Russia is pending. The investigations were requested in petitions filed on July 30, 2025, by Stillwater Mining Company and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Industrial and Services Workers International Union, AFL-CIO, CLC.

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on April 15, 2026, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.

Since 2000, Congress has provided an annual appropriation to LSC to award special funding for client self-help and information technology projects. LSC's TIG program funds technology tools to increase the quantity and quality of legal services available to eligible persons. TIG-funded projects develop, test, and replicate innovative technologies that help LSC grantees and state justice communities to improve low-income persons' access to high-quality legal assistance through integrated and well-managed technology systems. The TIG program also supports the effective use of technology at LSC-funded organizations through targeted assessment grants focused on improvements to technology systems and information security.

II. Funding Opportunity Information

A. Eligible Applicants

To be eligible for Technology Initiative Grants, applicants must be current grantees of LSC Basic Field-General, Basic Field-Migrant, or Basic Field-Native American grants. In addition, applicants must receive basic field funding of at least a one-year term, be up to date on reporting on any existing TIG-funded projects, and not have had a previous TIG terminated in the past three years for reporting or other performance issues.

B. Technology Initiative Grant Purpose and Key Goals

Since LSC's TIG program was established in 2000, LSC has made over 955 grants totaling over \$95 million. The TIG program encourages organizations to use technology in innovative ways to:

1. Effectively and efficiently provide high-quality legal assistance to low-income persons and to promote access to the judicial system through legal information, advice, and representation.
