Individual collection requests submitted under this Generic approval will include the tailored forms and a supplementary template. CDC programs who may be developing new, non-research NOFOs

or are currently collecting data under an approved NOFO are eligible to participate.

Currently, CDC programs have received OMB approval to collect performance measure data using the 0920–1282 Generic Information Collection. This Revision is requested to allow participating CDC programs to continue performance measure data collection through the remaining approval period and for additional

programs to use the Generic mechanism for future performance measure data collection. This Revision reflects expanded technical assistance that the Performance and Evaluation Office (PEO) provides.

CDC requests OMB approval for an estimated 104,949 annual burden hours. Participation of respondents is voluntary. There are no costs to respondents other than their time.
