

multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets. State-of-the-art technology is used in the missile to provide it with beyond-visual-range capability. Although designed as an air-to-air missile, the AMRAAM can also be employed in a surface-launch mode when integrated on systems such as NASAMS.

8. The AIM-120C-8 AMRAAM-Extended Range (ER) has the same capability as the AMRAAM, but with a larger rocket motor and control section to allow it to travel further.

9. The AIM-9X Sidewinder Block II and Block II+ missiles represent a substantial increase in missile acquisition and kinematics performance over the AIM-9M and replace the AIM-9X Block I configuration. The missiles include a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe, and the ability to integrate the Helmet Mounted Cueing System. The most current AIM-9X Block II/II+ Operational Flight Software developed for all international partner countries, which is authorized for export by U.S. Government export policy, provides fifth-generation infrared capabilities

such as lock-on-after-launch, weapons data link, and surface-launch. No software source code or algorithms will be released.

10. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

11. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

12. A determination has been made that Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

13. All defense articles and/or services listed in this transmittal have been authorized for release and export to the Government of Egypt.

JUL 17 2025

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 25-00. This transmittal notifies a cost increase in excess of the total value previously described in the Section 36(b)(1) AECA certification 23-42 of September 20, 2023.

Sincerely,

Michael F. Miller
Director

BILLING CODE 6001-FR-C

Transmittal No. 25-00

**REPORT OF ENHANCEMENT OR
UPGRADE OF SENSITIVITY OF
TECHNOLOGY OR CAPABILITY (SEC.
36(B)(5)(C), AECA)**

(i) *Prospective Purchaser:* Government of Kuwait

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 23-42

Date: September 20, 2023

Implementing Agency: Army

Funding Source: National Funds

(iii) *Description:* On September 20, 2023, Congress was notified by congressional certification transmittal number 23-42 of the possible sale, under Section 36(b)(1) of the Arms Export Control Act, of the replacement of expiring limited life components and certifications testing in order to support an operational life of thirty (30) years for Patriot Advanced Capability-3 (PAC-3) missiles. Included in this potential sale were: test and repair of PAC-3 missiles; stockpile reliability testing and field returns; repair and return of classified and unclassified PAC-3 missile items and ground support equipment (GSE)

component level parts; replenishment of classified and unclassified missile spares, GSE spares, and seeker spares; tools to improve the turnaround time of the repair and recertification efforts; air transportation services for missile processing; United States (U.S.) Government and contractor technical and logistics support; training devices; organizational equipment; support equipment; test equipment; technical data and publications; personnel training and training equipment; and other related elements of logistics and program support. The estimated total cost was \$150 million. There was no Major Defense Equipment (MDE) associated with this sale.

This transmittal notifies an increase in non-MDE value by \$100 million, due to recent cost increases. There are no additional MDE or non-MDE items being reported with this notification. The estimated non-MDE and total case values will increase by \$100 million to a revised \$250 million.

(iv) *Significance:* Recent cost increases have brought about the need to add value to the original notification.

The proposed value increase will improve Kuwait's capability to meet current and future threats.

(v) *Justification:* This proposed sale will support the foreign policy goals and national security objectives of the U.S. by improving the security of a major non-NATO ally that is a force for political stability and economic progress in the Middle East.

(vi) *Sensitivity of Technology:* None

(vii) *Date Report Delivered to Congress:* July 17, 2025
