

NUCLEAR REGULATORY COMMISSION

[NRC–2026–0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of April 20, 27, and May 4, 11, 18, 25, 2026. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: <https://www.nrc.gov/public-involve/public-meetings/schedule.html>.

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (e.g., braille, large print), please contact the Reasonable Accommodations Resource by email at Reasonable_Accommodations.Resource@nrc.gov. Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at Betty.Thweatt@nrc.gov or Samantha.Miklaszewski@nrc.gov.

MATTERS TO BE CONSIDERED:**Week of April 20, 2026**

Tuesday, April 21, 2026

10:00 a.m. Meeting with the Advisory Committee on the Medical Uses of Isotopes (Public Meeting) (Contact: Ally Mara: 301–415–2509)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Thursday, April 23, 2026

10:00 a.m. Briefing on the Annual Threat Environment (Closed Ex. 1)

Week of April 27, 2026—Tentative

There are no meetings scheduled for the week of April 27, 2026.

Week of May 4, 2026—Tentative

Tuesday, May 5, 2026

10:00 a.m. Briefing on Human Capital and Equal Employment

Opportunity (Public Meeting)
(Contact: Erin Deeds: 301–415–2887)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Thursday, May 7, 2026

9:00 a.m. Strategic Programmatic Overview of the Fuel Facilities and Spent Fuel Storage and Transportation Business Lines (Public Meeting) (Contact: Annie Ramirez: 301–415–6780)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Week of May 11, 2026—Tentative

There are no meetings scheduled for the week of May 11, 2026.

Week of May 18, 2026—Tentative

There are no meetings scheduled for the week of May 18, 2026.

Week of May 25, 2026—Tentative

There are no meetings scheduled for the week of May 25, 2026.

CONTACT PERSON FOR MORE INFORMATION:

For more information or to verify the status of meetings, contact Wesley Held at 301–287–3591 or via email at Wesley.Held@nrc.gov.

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

For the Nuclear Regulatory Commission.

Dated: April 15, 2026.

Wesley W. Held,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2026–0760]

Draft Interim Staff Guidance: NRC Application Pathway for Reactor Designs Previously Authorized by U.S. Department of Energy or Department of War

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft guidance; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is soliciting public comment on its draft Interim Staff Guidance (ISG), DANU–ISG–2026–XX, “NRC Application Pathway for Reactor Designs Previously Authorized by U.S. Department of Energy or Department of War.” The purpose of this guidance is to provide a roadmap to NRC requirements, and associated implementing guidance, in select foundational areas to support streamlined NRC reviews of certain applications that propose to address the accomplishment of safety functions by leveraging pertinent information from prior U.S. Department of Energy (DOE) or Department of War (DOW) authorizations of demonstration reactors.

DATES: Submit comments by May 18, 2026.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–0760. Address questions about Docket IDs in [Regulations.gov](https://www.regulations.gov) to Bridget Curran; telephone: 301–415–1003; email: Bridget.Curran@nrc.gov. For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–5–A85, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jim Kinsey, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–0754; email: James.Kinsey@nrc.gov.

SUPPLEMENTARY INFORMATION:**I. Obtaining information and Submitting Comments***A. Obtaining Information*

Please refer to Docket ID NRC–2026–0760 when contacting the NRC about the availability of information for this action. You may obtain publicly

available information related to this action by any of the following methods:

- *Federal Rulemaking Website*: Go to <https://www.regulations.gov> and search for Docket ID NRC–2026–0760.
- *NRC’s Agencywide Documents Access and Management System (ADAMS)*: You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin ADAMS Public Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. The draft ISG, titled “NRC Application Pathway for Reactor Designs Previously Authorized by U.S. Department of Energy or Department of War,” is available in ADAMS under Accession No. ML25363A192.

- *NRC’s PDR*: The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2026–0760 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

On May 23, 2025, President Donald J. Trump signed Executive Order (E.O.) 14300, “Ordering the Reform of the Nuclear Regulatory Commission.” Section 5, “Reforming and Modernizing the NRC’s Regulations,” requires the NRC to undertake a review and wholesale revision of its regulations and guidance documents as guided by the policies set forth in section 2 of E.O. 14300. Section 5(d) of the E.O. requires the NRC to establish an expedited pathway to approve reactor designs that the U.S. DOE or DOW have tested and that have demonstrated the ability to function safely.¹ The NRC is addressing section 5(d) of this E.O. primarily through two activities, as summarized later in this document. This **Federal Register** notice includes one such activity. Specifically, the NRC is issuing and requesting comment on this draft ISG that would facilitate the development and review of applications for an NRC approval that seeks to leverage a prior DOE or DOW authorization.

The purpose of this draft ISG is to provide a roadmap to NRC requirements and associated guidance for areas in select, foundational areas of reactor facility safety and the protection of public health and safety. Due to the broad range of technology types and deployment options that may be authorized by DOE and DOW, this roadmap compiles NRC application requirements to aid developers while they are establishing their DOE or DOW authorization request and related NRC commercial licensing strategy. Importantly, this roadmap is not intended to be a comprehensive recitation of all applicable NRC requirements for a given requested approval. Nevertheless, upon finalization, this ISG is intended to assist prospective NRC applicants in determining how they can best maximize the overlap between what would be required to satisfy both sets of requirements (*i.e.*, NRC requirements and DOE or DOW requirements, as applicable). In so doing, the NRC may be able to leverage more information that has been previously reviewed and accepted by DOE or DOW when the NRC staff performs its subsequent review of a commercial application. In addition, this ISG is also intended to support a streamlined NRC review of applications in areas that include pertinent information regarding the

accomplishment of safety functions related to DOE or DOW authorized reactor facilities, in which the NRC staff would appropriately adjust the focus and depth of that review when implementing the whole-of-government “leveraging” concept introduced by E.O. 14300.

While not the subject of this **Federal Register** notice, the other primary activity is the initiation of a separate rulemaking that proposes to amend NRC requirements in part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities,” and part 53, “Risk-Informed, Technology-Inclusive Regulatory Framework for Commercial Nuclear Plants,” to establish an explicit pathway for streamlined reviews for licensing commercial reactor designs that have previously received DOE or DOW authorization and that have been tested and demonstrated the ability to function safely. No change is needed for 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants,” as it references the requirement that is proposed to be modified in the rulemaking. The proposed rule for that activity, “NRC Reviews of Reactor Designs Previously Authorized by U.S. Department of Energy or Department of War,” was published and noticed for comment in the **Federal Register** on April 2, 2026. (91 FR 16584). The information in this ISG supports NRC reviews of applications under 10 CFR part 50 or part 52 pursuing the explicit pathway established by the proposed rulemaking.

Other efforts that aid in the implementation of section 5(d) of E.O. 14300 include the NRC’s issuance of an addendum to the previously existing Memorandum of Understanding (MOU) titled, “Coordinating DOE and NRC Technical Expertise and Knowledge on Advanced Nuclear Reactor and Advanced Reactor Fuel Technologies,” between the NRC and DOE (ADAMS Accession No. ML25303A288). In particular, the addendum addresses coordination of DOE and NRC technical readiness and sharing of technical expertise and knowledge on advanced nuclear reactor and advanced reactor fuel technologies. The addendum also enables the documented safety analyses for DOE-authorized nuclear facilities that have been tested and that have demonstrated the ability to function safely to be leveraged to streamline and expedite future NRC licensing activities pursuant to E.O. 14300, section 5(d). Future planned activities may include the development of a crosswalk between the NRC regulations and guidance summarized in this ISG and associated

¹ Consistent with E.O. 14347, “Restoring the United States Department of War,” this **Federal Register** notice refers to the “Department of War” and “Department of Defense” interchangeably.

DOE authorization process requirements, and consideration and development of other MOUs, as appropriate.

III. Backfitting, Forward Fitting, and Issue Finality

This draft ISG provides guidance for the development and NRC staff review of applications for licenses, permits, certifications, or approvals under 10 CFR parts 50 and 52 that include consideration of relevant information gathered from a design that has been previously authorized by DOE or DOW as a utilization facility and that has been tested and has demonstrated the ability to function safely. Issuance of this ISG as final would not constitute backfitting as defined in 10 CFR 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; would not constitute forward fitting as that term is defined and described in MD 8.4; and would not affect the issue finality of any approval issued under 10 CFR part 52. The guidance would be for voluntary use by future applicants and would not be imposed on any current licensees or applicants or existing or requested approvals under 10 CFR parts 50 or 52, and therefore its issuance would not constitute a backfit, forward fit, or a change affecting issue finality.

IV. Executive Order (E.O.) 12866

The Office of Information and Regulatory Affairs determined that the draft ISG, titled “NRC Application Pathway for Reactor Designs Previously Authorized by U.S. Department of Energy or Department of War,” is not a significant regulatory action under E.O. 12866.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: April 15, 2026.

For the Nuclear Regulatory Commission.

Jonathan Greives,

Director, Division of Advanced Reactors and Non-Power Production and Utilization Facilities, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-105231; File No. SR-CMESC-2026-003]

Self-Regulatory Organizations; CME Securities Clearing Inc.; Notice of Filing of Proposed Rule Change To Establish the CME Securities Clearing Inc. Enterprise Risk Management Framework

April 14, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”)¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 1, 2026, CME Securities Clearing Inc. (“CMESC”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change described in Items I, II, and III below, which Items have been substantially prepared by CMESC. CMESC filed the proposed rule change pursuant to Section 19(b)(2) of the Act.³ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. CMESC’s Statement of the Terms and Substance of the Proposed Rule Change

The proposed rule change consists of CMESC’s enterprise risk management framework (“Enterprise Risk Management Framework” or “ERMF”) that provides a framework and common methodology used by CMESC to identify and manage potential events that may affect CMESC, categorize and assess risk, define the risk governance structure and accountability, and detail how risk is managed and reported across its enterprise as a covered clearing agency. As described in more detail below, the Enterprise Risk Management Framework consists of five parts—the purpose and statement of framework, the applicability of ERMF, governance, risk universe and ERM lifecycle. The ERMF is annexed hereto as Exhibit 5.

II. CME’s Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, CMESC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. CMESC has prepared

summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. CMESC’s Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

1. Purpose

Background

On December 1, 2025, the Securities and Exchange Commission (“Commission” or “SEC”) issued an order (“Order”) approving CMESC’s Form CA-1 (“Application”) for registration as a clearing agency to provide central counterparty services for transactions involving U.S. Treasury securities, finding the Application satisfies the requirements of the Act and rules and regulations thereunder.⁴ Specifically, the Commission determined that “the CMESC Application establishes a comprehensive risk management framework consistent with Commission rules.”⁵ The Commission’s determination was based, among others, on its review of CMESC’s risk management framework (“Risk Management Framework” or “RMF”), submitted as part of the Application. The RMF provides a comprehensive risk management framework for CMESC to identify, measure, monitor, and manage the range of risks that arise in or are borne by the covered clearing agency, consistent with Rule 17ad-22(e)(3).⁶ The RMF is designed to work cohesively with the Enterprise Risk Management Framework, which identifies and assesses the sources of risks covered by the RMF and their potential impact on CMESC’s operations and services. As described more fully below, the Enterprise Risk Management Framework establishes an ERM program that assists CMESC to define and implement effective risk management capabilities described in the RMF by applying a holistic and systematic approach. This approach identifies potential events that may affect CMESC, monitors and manages the risks in accordance with the “Risk Appetite” established by the Board and consistent with the three lines of defense model described in the RMF, thereby providing reasonable assurance that the risks covered by the RMF are adequately managed.

⁴ Release No. 34-104281 (Dec. 1, 2025), 90 FR 55926 (Dec. 4, 2025), available at <https://www.federalregister.gov/documents/2025/12/04/2025-21908/cme-securities-clearing-inc-order-granting-an-application-for-registration-as-a-clearing-agency>.
